1 **STATEMENT OF INTEREST**

2 The American Academy of Pediatrics (“AAP”), the American Medical  
3 Association (“AMA”), the American College of Physicians (“ACP”), the Washington  
4 Chapter of the American Academy of Pediatrics (WCAAP), and the Washington State  
5 Medical Association (WSMA) (collectively, “*Amici*”) respectfully submit this brief as  
6 *amici curiae* in support of Plaintiffs’ Motion for Preliminary Injunction. *Amici* are  
7 leading medical organizations in the United States whose members collectively provide  
8 medical care to the most vulnerable groups of people in society, including children,  
9 pregnant women, and persons who are disabled or those who suffer from chronic  
10 illnesses.

11 The AAP is a non-profit professional membership organization of 67,000  
12 primary care pediatricians and pediatric medical subspecialists, and pediatric surgical  
13 specialists dedicated to the health and well-being of infants, children, adolescents, and  
14 young adults. AAP believes that the future prosperity and well-being of the United  
15 States depends on the health and vitality of all of its children, without exception. Access  
16 to health care, nutrition, and housing assistance programs ensures that children grow up  
17 healthy and strong. AAP is uniquely positioned to understand the impact of the  
18 Administration’s public charge regulation on the health of vulnerable populations,  
19 including children.

20 Amicus curiae the AMA is the largest professional association of physicians,  
21 residents and medical students in the United States. Additionally, through state and  
22 specialty medical societies and other physician groups seated in its House of Delegates,  
23 substantially all U.S. physicians, residents and medical students are represented in the  
24 AMA’s policy making process. AMA members practice in every state and in every  
25 medical specialty. The AMA was founded in 1847 to promote the art and science of  
26 medicine and the betterment of public health, and these remain its core purposes. The  
27 AMA joins this brief on its own behalf and as a representative of the Litigation Center  
28 of the AMA and the State Medical Societies. The Litigation Center is a coalition among

1 the AMA and the medical societies of each state and the District of Columbia, whose  
2 mission is to advance the interests of the medical profession and their patients in the  
3 courts. The AMA is exceptionally well-suited to appreciate the impact of the Regulation  
4 on the health of vulnerable populations.

5 Amicus curiae the ACP is the largest medical specialty organization and the  
6 second-largest physician group in the United States. ACP members include 159,000  
7 internal medicine physicians (internists), related subspecialists, and medical students.  
8 Internal medicine physicians are specialists who apply scientific knowledge and clinical  
9 expertise to the diagnosis, treatment, and compassionate care of adults across the  
10 spectrum from health to complex illness.

11 Amicus curiae WCAAP represents over 1100 pediatric health care providers  
12 from across Washington State. WCAAP’s mission is to optimize the health and well-  
13 being of children and their families while advancing pediatric care. WCAAP frames  
14 and leads the public discussion on child health issues, advances public policy to benefit  
15 children, and empowers pediatricians to provide quality medical care.

16 Amicus curiae WSMA represents 11,300 physicians, residents, medical students  
17 and physician assistants throughout Washington state. Our mission is to advance strong  
18 physician leadership and advocacy to shape the future of medicine and advance quality  
19 care for all Washingtonians. Our vision: to make Washington the best place to practice  
20 medicine and to receive care.

21 *Amici* submit this brief in support of Plaintiffs’ motion for preliminary injunction  
22 to highlight for the Court the immediate and irreparable harm that will impact millions  
23 of vulnerable individuals if Plaintiffs’ motion is denied.

## 24 **BACKGROUND AND SUMMARY OF ARGUMENT**

25 The United States Department of Homeland Security (“DHS”) has drastically  
26 overhauled decades of precedent and Congressional intent by promulgating  
27 *Inadmissibility on Public Charge Grounds*, 84 Fed. Reg. 41292-01 (Aug. 14, 2019) (the  
28 “Regulation”). The Regulation dramatically alters the factors considered by

1 immigration officials in evaluating whether a non-citizen seeking to immigrate or adjust  
2 their immigration status will become a “public charge.”<sup>1</sup> Prior to this Regulation, public  
3 charge referred to an individual who was likely to become primarily dependent on the  
4 government, such as someone who received cash assistance for income maintenance or  
5 was institutionalized in a government-funded long-term care facility.<sup>2</sup> The use of  
6 benefits such as health services or nutrition assistance were not considered in the public  
7 charge determination.

8 The Regulation now interprets public charge to be an immigrant “who receives  
9 one or more public benefits,...for more than 12 months in the aggregate within any 36-  
10 month period (such that, for instance, receipt of two benefits in one month counts as  
11 two months.)”<sup>3</sup> The definition of “public benefits” has also been enlarged to now  
12 include health, nutrition, and housing programs such as non-emergency Medicaid for  
13 non-pregnant adults and Supplemental Nutritional Assistance Program (“SNAP”).

14 Application of the Regulation’s totality of the circumstances test and  
15 consideration of the minimum factors<sup>4</sup> (age, health, family status, education and skills,  
16 and financial status) will have a disparate impact on certain groups including children,  
17 pregnant women, and persons suffering from disabilities and chronic health conditions.  
18 The receipt of public benefits is deemed to be a “heavily weighted” negative factor,<sup>5</sup>

19 \_\_\_\_\_  
20 <sup>1</sup> Under Section 212(a)(4) of the Immigration and Nationality Act (“INA”), an  
21 individual seeking admission to the United States or seeking to adjust status is  
22 inadmissible if the individual is likely at any time to become a public charge. See 8  
23 U.S.C. § 1182(a)(4)(A).

24 <sup>2</sup> Field Guidance on Deportability and Inadmissibility on Public Charge Grounds, 64  
25 Fed. Reg. 28689-01 (May 26, 1999).

26 <sup>3</sup> 8 C.F.R. § 212.21(a).

27 <sup>4</sup> 8 C.F.R. § 212.22(a), (b).

28 <sup>5</sup> 8 C.F.R. § 212.22(c).

1 and by expanding the definition of public benefits to include health and nutrition  
 2 programs,<sup>6</sup> the impact of the Regulation on vulnerable populations is amplified.  
 3 Though DHS claims the Regulation is intended to promote self-sufficiency, there is no  
 4 evidence that chilling the use of health and nutrition benefits will result in an increase  
 5 in income, employment, or educational status of immigrants. Amici submit this brief  
 6 to describe the deleterious impact this Regulation will have on the health of vulnerable  
 7 populations. These sweeping and detrimental changes will ultimately result in far  
 8 greater costs to the public’s health than any purported benefit offered by DHS.

## 9 ARGUMENT

### 10 I. THE PUBLIC CHARGE REGULATION TARGETS KEY HEALTH AND NUTRITION 11 PROGRAMS AND ALLOWS FOR DISCRIMINATORY DECISION MAKING.

12 The Regulation upends decades of settled policy with regard to public charge.  
 13 Historically, an immigrant could be deemed inadmissible if an immigration official  
 14 concluded that the immigrant was likely to become a public charge—interpreted to  
 15 mean *primarily dependent on public assistance*. The Regulation now broadly defines  
 16 “public charge” to include anyone who has received or is likely to receive a wide range  
 17 of public benefits. The programs targeted by the Regulation include medical benefits  
 18 such as Medicaid, nutrition benefits such as SNAP, and housing assistance—all of  
 19 which may be integral to keep immigrants and their family members healthy, fed, and  
 20 sheltered.<sup>7</sup> The Regulation employs a “totality of the circumstances” test which is so  
 21 all-encompassing that vulnerable populations such as children, pregnant women and  
 22 individuals with disabilities are uniquely at risk for discrimination under the test simply  
 23 because of their age or health status.

24  
 25  
 26 <sup>6</sup> 8 C.F.R. § 212.21 ((except for non-citizen immigrants under 21 years old or pregnant  
 27 women or up to 60 days postpartum).

28 <sup>7</sup> 8 C.F.R. § 212.21.

1           **A. Utilization of Essential Health and Nutrition Programs Are Targeted**  
2           **by the Regulation.**

3           The Regulation expands the definition of “[p]ublic benefit” to include significant  
4 non-cash benefit programs including SNAP, Medicaid, and Section 8 housing benefits.<sup>8</sup>  
5 These types of non-cash public benefit programs have been key to upward mobility for  
6 generations of immigrants. This expansion of the definition of public benefit will affect  
7 many immigrant families, especially those with low to moderate incomes. For example,  
8 the Regulation gives immigration officers broad discretion to make a public charge  
9 determination based on whether an immigrant may utilize, at some point in the future,  
10 Medicaid, SNAP, or housing benefits. Certain groups of immigrants, such as parolees  
11 or those subject to withholding of removal, would be penalized for utilizing Medicaid  
12 if they ever sought to adjust their immigration status through a family member.  
13 Immigrants with health conditions that require “extensive treatment” who receive health  
14 coverage through state-funded programs would be penalized if they cannot demonstrate  
15 an ability to purchase private insurance.

16           Equally significant, the Regulation’s chilling effect will impact many additional  
17 families. The Regulation has already resulted in widespread confusion and fear  
18 throughout the immigrant community, causing many to forego such assistance  
19 including assistance for which they are legally entitled under federal or state law. In  
20 fact, there was an increase in the child uninsurance rate in 2018 to 5.5% which is largely  
21 because of a decline in children’s Medicaid and CHIP coverage rates.<sup>9</sup> Rates of decline  
22

---

23 <sup>8</sup> 8 C.F.R. § 212.21(b).

24 <sup>9</sup> [https://www.census.gov/library/stories/2019/09/uninsured-rate-for-children-in-](https://www.census.gov/library/stories/2019/09/uninsured-rate-for-children-in-2018.html)  
25 [2018.html](https://www.census.gov/library/stories/2019/09/uninsured-rate-for-children-in-2018.html) (reporting that Hispanic children were more likely to be uninsured than  
26 children from other races and non-Hispanic origin groups. Between 2017 and 2018,  
27 the uninsured rate increased 1.0 percentage point for Hispanic children and 0.5  
28 percentage points for non-Hispanic Whites).

1 were highest for Hispanic children. Sadly, this puts parents and children at risk for  
2 poorer health outcomes, additional economic hardship, and long-term consequences.

3 **B. The Totality of the Circumstances Test Is so Vague It Will Result in**  
4 **Discriminatory Decision Making.**

5 The Regulation is problematic in that its application by immigration officers is  
6 likely to result in inconsistent and discriminatory outcomes. The Regulation states that  
7 the public charge determination “must be based on the totality of the alien’s  
8 circumstances by weighing all factors that are relevant to whether the alien is more  
9 likely than not...to receive one or more public benefits . . . .”<sup>10</sup> While on its face, the  
10 Regulation describes the determination as based on a totality of the circumstances, it is  
11 anything but. The immigration officer is instructed to consider a set of minimum factors  
12 (age, health, family status, education and skills, and financial status), heavily weighted  
13 negative factors (e.g., employment status, receipt of public benefits, diagnosis of an  
14 extensive medical condition without adequate private insurance), and heavily weighted  
15 positive factors (household income of at least 250% of the federal poverty guidelines,  
16 employment with an income of at least 250% of federal poverty guidelines, and private  
17 health insurance).<sup>11</sup> There is no guidance provided on how to balance the competing  
18 factors, especially when in many cases some factors have more impact than others.

19 Most significantly, the application of each of these factors will have a disparate  
20 impact on vulnerable populations. For example, as discussed in more detail below,  
21 children will automatically have their age counted against them. In addition, the  
22 inclusion of one factor in particular—“health”—will likely result in discrimination  
23 across the board. The Regulation states:

24 DHS will consider whether the alien’s health makes the alien more likely  
25 than not to become a public charge at any time in the future, including  
26

27 <sup>10</sup> 8 C.F.R. § 212.22(a) (emphasis added).

28 <sup>11</sup> 8 C.F.R. § 212.22(b), (c).

1 whether the alien has been diagnosed with a medical condition that is likely  
2 to require extensive medical treatment or institutionalization or that will  
3 interfere with the alien’s ability to provide and care for himself or herself,  
4 to attend school, or to work upon admission or adjustment of status.<sup>12</sup>

5 This implicit definition of “medical condition” is so broad as to be unworkable. There  
6 is no guidance provided as to what “extensive medical treatment” consists of, or what  
7 type of medical condition would rise to the level of “interfer[ing]” with work or school.  
8 This vague standard could include anything from a condition requiring the use of  
9 expensive medical equipment such as a power wheelchair to a child’s learning disability  
10 that requires an Individualized Education Plan.

11 The Regulation further provides that the immigration official can rely on  
12 evidence that includes, *but is not limited to*, (i) an immigration medical examination, or  
13 if the immigration officer finds the report to be incomplete (ii) evidence of such a  
14 medical condition.<sup>13</sup> There is no further requirement of the type or quality of such  
15 “evidence,” including whether the evidence must be documented by a medical  
16 professional. Moreover, the Regulation expressly states that the immigration officer is  
17 not limited to these two categories of evidence. The Regulation provides no restrictions  
18 on what the immigration officer can consider when evaluating an immigrant’s health.  
19 This provision has the potential of allowing an immigration official to act as an  
20 unqualified medical expert, with no oversight.<sup>14</sup>

21 The Regulation expands the definition of public benefit and relies on an

22 \_\_\_\_\_  
23 <sup>12</sup> 8 C.F.R. § 212.22(b)(2)(i).

24 <sup>13</sup> 8 C.F.R. § 212.22(b)(2)(ii).

25 <sup>14</sup> Not only is it manifestly unjust for an immigration officer, with no medical training,  
26 to make a determination about the health status of an immigrant, such a scenario  
27 contravenes 42 C.F.R. §34 et seq (setting forth the requirements for medical  
28 examinations of aliens).

1 ambiguous “totality of circumstances” test to evaluate whether an immigrant is or will  
2 become a public charge. The application of this Regulation will have a negative impact  
3 on the health of immigrants and their families and an even more severe effect on the  
4 health of vulnerable populations, including children, pregnant women, and disabled  
5 individuals. The impact of this rule on each of these vulnerable populations is set forth  
6 in more detail below.

7 **II. BOTH CITIZEN AND NON-CITIZEN CHILDREN WILL BE HARMED BY THE**  
8 **PUBLIC CHARGE REGULATION.**

9 The Regulation will have a devastating impact on children in this country—  
10 increasing the likelihood that immigrant children will be designated a public charge and  
11 reducing access to health and nutrition benefits for all children, including U.S. citizens.

12 **A. The Totality of Circumstances Test Will Disproportionally Impact**  
13 **Non-Citizen Children.**

14 Immigrant children are plainly disadvantaged by the Regulation’s “totality of  
15 circumstances” public charge test. At the very least, a child’s age will count against  
16 him or her as a negative factor.<sup>15</sup> A child will also be penalized by the “education and  
17 skills” factor, as it is unlikely the child could demonstrate “adequate education and skills  
18 to either obtain or maintain lawful employment.”<sup>16</sup> Additional negative factors are  
19 related to larger family size (implicated if the child has siblings) or if the child resides  
20 in a single parent household.<sup>17</sup> If the child has a medical condition that requires

21 \_\_\_\_\_  
22 <sup>15</sup> 8 C.F.R. § 212.22(b)(1) (“When considering an alien’s age, DHS will consider  
23 whether the alien’s age makes the alien more likely than not to become a public  
24 charge at any time in the future, such as by impacting the alien’s ability to work,  
25 including whether the alien is between the age of 18 and the minimum ‘early  
26 retirement age’ for Social Security . . .”).

27 <sup>16</sup> 8 C.F.R. § 212.22(b)(5).

28 <sup>17</sup> 8 C.F.R. § 212.21(d)(2); 8 C.F.R. § 212.22(b)(3).

1 “extensive medical treatment” or “interfere[s]” with the child’s ability to attend school,  
2 this will count as a negative factor.<sup>18</sup> One study reported that 4.8 million children in  
3 need of medical attention live in households with at least one noncitizen adult and are  
4 insured by Medicaid or CHIP.<sup>19</sup> This includes a significant number of children with at  
5 least one potentially life-threatening condition or illness, including asthma, influenza,  
6 diabetes, epilepsy, or cancer.<sup>20</sup> Children who live with such medical conditions and  
7 who reside in households that cannot obtain or afford private health insurance would be  
8 penalized with a heavily weighted negative factor under §212.22(c)(1)(iii).

9 While the Regulation exempts from the public benefits definition the receipt of  
10 Medicaid benefits by immigrants under the age of 21,<sup>21</sup> consideration of all the factors  
11 in the “totality of circumstances” test will make it uniquely difficult for children,  
12 particularly those with health challenges or those in lower income households, to avoid  
13 being determined a public charge.

14 **B. Children’s Health Will Be Harmed by the Public Charge Regulation.**

15 The impact of the Regulation on the health and well-being of all children in  
16 immigrant families cannot be understated. Many such families rely on government  
17 programs for preventive, rehabilitative, habilitative, and emergency health needs as well  
18 as supplemental nutrition. This Regulation will cause, or already has caused, families  
19 to disenroll from these programs.

20 \_\_\_\_\_  
21 <sup>18</sup> 8 C.F.R. § 212.22(b)(2).

22 <sup>19</sup> “[I]n need of medical attention” was defined in the study to be “children with a  
23 current or recent medical diagnosis, disability, and/or need for specific therapy.” Leah  
24 Zallman, *Changing Public Charge Immigration Rules: The Potential Impact on*  
25 *Children Who Need Care*, CALIFORNIA HEALTH CARE FOUNDATION, (October 23,  
26 2018), <https://www.chcf.org/publication/changing-public-charge-immigration-rules/>.

27 <sup>20</sup> *Id.*

28 <sup>21</sup> 8 C.F.R. § 212.21(a)(5)(iv).

1 The Regulation will have a chilling effect on programs specifically identified,  
2 such as SNAP and Medicaid. The fear and confusion over what is covered by the  
3 Regulation will also result in a chilling effect on programs that are not explicitly called  
4 out, such as the Children’s Health Insurance Program (CHIP), the Special Supplemental  
5 Nutrition Program for Women, Infants, and Children (WIC), and state-funded Medicaid  
6 programs.

7 This chilling effect is real, measurable, and exacerbated by the final Regulation.  
8 When the Regulation was published, before it was even finalized, immigrant families  
9 shied away from government healthcare programs and regular doctor’s appointments.<sup>22</sup>  
10 A study reported that one-seventh of all adults in immigrant families reported avoiding  
11 non-cash public benefits over the past year because of fear that their legal immigration  
12 status would be harmed.<sup>23</sup> Low-income members of immigrant families reported even  
13 higher rates of avoidance.<sup>24</sup> Of this group that avoided benefits, 46% avoided nutrition  
14 benefits (SNAP), 42% avoided medical benefits (Medicaid and CHIP), and 33%  
15 avoided public housing subsidies.<sup>25</sup> Notably, this chilling effect was measurable before  
16 the final Regulation was published, and it is expected that the rates of avoidance will be  
17 markedly higher once it is enforced.

18 Children will lose health coverage—whether due to chilling effects or their  
19 \_\_\_\_\_

26 [immigrant\\_families\\_reported\\_avoiding\\_publi\\_2.pdf](https://www.urban.org/sites/default/files/publication/100270/one_in_seven_adults_in_immigrant_families_reported_avoiding_publi_2.pdf).

27 <sup>24</sup> Id.

28 <sup>25</sup> Id.

1 households being directly targeted by this Regulation—to potentially disastrous  
2 effects.<sup>26</sup> A study found that disenrollment of children in need of medical care would  
3 likely contribute to child deaths and future disability.<sup>27</sup> Foregoing regular treatment for  
4 such children will likely lead to increased health care costs and disastrous outcomes.<sup>28</sup>  
5 For these vulnerable children, the loss of health coverage would be catastrophic.

6 While the loss of health coverage by parents has a significant negative impact on  
7 their children’s health coverage, the converse is also true. When parents gain access to  
8 health coverage, their children also gain access to health coverage.<sup>29</sup> It is well  
9 documented that children who access health care early on have long-term improved  
10 health and educational outcomes. For example, increased access to health insurance  
11 such as Medicaid in early childhood leads to long-term health improvements such as a  
12 decline in prevalence of high blood pressure, reduced adult hospitalizations, reduction  
13 in self-reported rates of disability, and reduced mortality in teenage and adult years.<sup>30</sup>

28 2017), at 4-5, <https://ccf.georgetown.edu/wpcontent/uploads/2017/03/>

1 The benefits to providing insurance coverage to children are wide ranging, including  
 2 improving children's access to health and dental care, improving parental satisfaction,  
 3 and saving money.<sup>31</sup> Access to health insurance during childhood also increases the  
 4 likelihood of graduating from high school and attending college, as well as achieving a  
 5 higher earning potential.<sup>32</sup>

6 Furthermore, access to nutritious food is fundamental to the healthy development  
 7 of all children. SNAP is the largest federal nutrition program that allows recipients to  
 8 buy healthy food. Children in immigrant families that receive SNAP benefits are more  
 9 likely to be in good or excellent health, be food secure, and reside in stable housing.<sup>33</sup>  
 10 These families have more resources to afford medical care and prescription  
 11 medications, compared to families who do not participate in SNAP.<sup>34</sup> Significantly, an

28 <sup>34</sup> *Id.*

1 additional year of SNAP eligibility for young children with immigrant parents is  
2 associated with significant health benefits in later childhood and adolescence.<sup>35</sup>

3 These results are not surprising: nutrition is one of the greatest environmental  
4 influences on the development of babies in the womb and during infancy.<sup>36</sup> A healthy  
5 balance of essential nutrients during a child's formative periods is imperative for normal  
6 brain development.<sup>37</sup> Neuroscientists describe such formative periods as "critical  
7 periods" and "sensitive periods" to emphasize the vulnerability of a child's developing  
8 brain.<sup>38</sup> During such periods, nutrient deficiencies can have irreversible long-term  
9 consequences such as preventing children from fully developing their potentials in  
10 sensori-motor, cognitive-language, and social-emotional functions.<sup>39</sup> Such failures to  
11 optimize brain development early in life have substantial and long-lasting ramifications.  
12 Studies have shown that children that do not meet certain developmental milestones are  
13 less likely to remain and succeed in school, less likely to earn higher incomes as adults,  
14 and less likely to provide adequate nutrition and educational opportunities to their own

1 children.<sup>40</sup>

2 Disincentivizing the use of SNAP or other public food security benefits by  
 3 immigrant families will result in enduring damage to the collective health and proper  
 4 development of all children in such families.<sup>41</sup> Such damage will only be compounded  
 5 over time as affected children suffer from higher likelihoods of falling short of their full  
 6 developmental potential, lower achievement in school, and having less satisfaction from  
 7 their professional careers.<sup>42</sup> Access to medical care and adequate nutrition allows early  
 8 identification of any issues before they become more serious or costly to treat. Given  
 9 the serious and irreparable health risks to children that will directly result from a lack  
 10 of access to health and nutrition programs, enforcement of the Regulation should be  
 11 enjoined.

12 **III. THE PUBLIC CHARGE REGULATION WILL ACT AS A BARRIER TO HEALTH**  
 13 **CARE FOR PREGNANT AND POSTPARTUM WOMEN.**

14 In addition to children, the Regulation will greatly hamper the ability of pregnant  
 15 and postpartum women to obtain or maintain legal immigration status. Equally  
 16 important, the Regulation will have a tragic effect on the health of this population.

1           **A. The Totality of Circumstances Test Will Disproportionally Impact**  
 2           **Pregnant and Postpartum Women.**

3           Under the Regulation’s totality of circumstances test, women could be penalized  
 4 for being pregnant or for having given birth. As discussed above in Section I.B., the  
 5 Regulation explicitly mandates that a heavily-weighted negative factor is the  
 6 immigrant’s “health,” including diagnosis of a medical condition requiring extensive  
 7 medical treatment or interfering with care, school, or work.”<sup>43</sup> If the individual does  
 8 not have private health insurance, this will be considered as an additional heavily  
 9 weighted negative factor.<sup>44</sup> If an individual has one or more heavily weighted negative  
 10 factor, “DHS generally will not favorably exercise discretion to allow submission of a  
 11 public charge [surety] bond.”<sup>45</sup> A pregnant woman (or one who has recently given  
 12 birth)—especially a woman who has suffered serious pregnancy-related  
 13 complications—who is unable to afford private insurance to cover the birth or post-  
 14 partum care will plainly be penalized. Moreover, while the Regulation exempts receipt  
 15 of Medicaid benefits for women who are pregnant and for 60 days post-partum as a  
 16 factor in the public charge determination, Medicaid-eligible immigrants who utilize the  
 17 program after the 60-day postpartum period would be given a “heavily weighted  
 18 negative factor.”<sup>46</sup>

19           **B. Pregnant and Postpartum Women Will Be Directly Harmed by the**  
 20           **Public Charge Regulation.**

21           As with other vulnerable populations, the Regulation will have the effect of  
 22 reducing the use of social safety net programs by pregnant women and those who  
 23 recently gave birth. These barriers to prenatal and postnatal care will have a drastic

28 <sup>46</sup> 8 C.F.R. § 212.22(c)(1).

1 impact on the health of these women, their babies, and other family members. Regular  
2 prenatal care is proven to help prevent and detect serious pregnancy complications in  
3 the mother, including hypertension, infection, and anemia.<sup>47</sup> Not surprisingly, lack of  
4 adequate prenatal care contributes to higher rates of maternal mortality.<sup>48</sup> Foregoing  
5 postpartum care, which is crucial to the health and well-being of mothers, newborns,  
6 and families, could also mean that women endure postpartum depression without proper  
7 medical, social, and psychological care, skip doctor's visits that address infant feeding,  
8 nutrition, and physical activity, or leave other postpartum health issues unaddressed.<sup>49</sup>

1 The lack of prenatal care can have serious implications for children, affecting  
2 their birth and early health outcomes.<sup>50</sup> Prenatal care has been shown to be associated  
3 with decreased incidence of low birth weight and newborn death.<sup>51</sup> For example,  
4 researchers studying the expansion of Emergency Medicaid Plus program in Oregon  
5 which resulted in expanding access to prenatal care found “a significant decrease in  
6 both the probability of extremely low birth weight infants and infant death with access  
7 to prenatal care.”<sup>52</sup> The decrease in infant mortality associated with expanded access to  
8 prenatal care was so great that it measured “greater than the 30-year reduction in infant  
9 mortality from Sudden Infant Death Syndrome (SIDS) associated with the “Back to  
10 Sleep” campaign.”<sup>53</sup>

11 Moreover, the United States already has the highest rate of maternal deaths in the  
12 developed world and one of the highest rates of infant mortality.<sup>54</sup> These rates are even  
13 higher in low-income communities and among women of color.<sup>55</sup> The CDC has  
14 identified contributing factors to maternal mortality and strategies to prevent future  
15 pregnancy-related deaths. These factors include community factors (e.g., unstable

27 <http://dx.doi.org/10.15585/mmwr.mm6818e1>).

28 <sup>55</sup> *Id.*

1 housing, access to clinical care, and limited access to transportation) and system factors  
2 (e.g., inadequate receipt of care and case coordination or management). Strategies to  
3 address community factors include “increasing availability and use of group prenatal  
4 care, prioritizing pregnant and postpartum women for temporary housing programs,  
5 improving availability of transportation services covered by Medicaid, and improving  
6 access to healthy foods and promoting healthy eating habits and weight management  
7 strategies.” Strategies to address system factors include “extend[ing] expanded  
8 Medicaid coverage eligibility for pregnant women to include one year of postpartum  
9 care.” Thus even if immigrant women are not penalized for using Medicaid during their  
10 pregnancy and immediately after birth, they will be penalized for accessing these types  
11 of medical safety-net programs that are demonstrated to reduce maternal mortality.

12 Moreover, DHS trivializes the immense cost of inadequate prenatal care to  
13 society. Inadequate prenatal care is associated with an increased risk of preterm babies,  
14 and the Institute of Medicine estimates that the medical costs for a preterm baby are  
15 much greater than for a healthy newborn.<sup>56</sup> Specifically, the economic burden  
16 associated with preterm birth in the United States was at least \$26.2 billion annually, or  
17 \$51,600 per infant born preterm.<sup>57</sup> To put it in perspective, the average preterm/low  
18 birth weight hospitalization cost \$15,100 with a 12.9 day length of stay, whereas, an  
19 uncomplicated newborn hospitalization cost \$600 with a 1.9 day stay.<sup>58</sup>

20 Unless enjoined, the Regulation is highly likely to cause irreparable damage to  
21 the health and well-being of immigrant pregnant and postpartum women, as well as the  
22 health and cognitive development of millions of infants and young children.

1 **IV. THE PUBLIC CHARGE REGULATION WILL ALSO PARTICULARLY HARM**  
2 **INDIVIDUALS WITH DISABILITIES AND CHRONIC HEALTH CONDITIONS.**

3 The Public Charge Regulation would directly harm the health of immigrants with  
4 disabilities and make it harder for them to successfully apply for a visa or permanent  
5 legal status. Of even greater concern, the Regulation creates a strong incentive for these  
6 individuals to avoid accessing necessary health and other non-cash benefit programs.

7 **A. The Totality of Circumstances Test Will Disproportionally Impact**  
8 **Individuals with Disabilities.**

9 Receipt of non-cash public benefits including Medicaid, inadequate private  
10 insurance, and a diagnosis with a medical condition that “will require extensive medical  
11 treatment” or “interfere with the individual’s ability to support himself or herself” are  
12 all heavily weighted negative factors in the public charge determination. As a result,  
13 this Regulation will have a devastating impact on the ability of immigrants with  
14 disabilities and chronic health conditions to obtain, adjust, or maintain legal residency  
15 in the United States.

16 **B. Individuals with Disabilities Will Suffer Negative Consequences to**  
17 **Their Health and Well-Being.**

18 The Regulation acts as a significant roadblock for disabled immigrants and their  
19 families to become and remain self-sufficient. Public benefit programs, including  
20 Medicaid, are essential to facilitate educational and employment opportunities for  
21 people with disabilities and chronic conditions. Medicaid covers primary care,  
22 preventative care, medical treatment, and supportive services for people with  
23 disabilities.<sup>59</sup> For many, Medicaid is the *only* source for critical community living  
24 supports (like personal care services, nursing services, respite, intensive mental health  
25 services and employment supports).

26 \_\_\_\_\_  
27 <sup>59</sup> Congressional Research Service, Who Pays For Long-Term Services and Supports?  
28 (Aug. 22, 2018), <https://fas.org/sgp/crs/misc/IF10343.pdf>

1           There is a strong link between Medicaid and the ability of individuals with  
2 disabilities to live independently, and Medicaid is critical to help ensure that individuals  
3 with disabilities disabled individuals can attend school and work.<sup>60</sup> For example, more  
4 than 150,000 individuals with disabilities participate in Medicaid buy-in programs,  
5 which provides Medicaid coverage for those who participate in the labor force.<sup>61</sup> It is  
6 well documented that these Medicaid buy-in participants earn more, work more,  
7 contribute more in taxes, and rely less on food stamps than people with disabilities who  
8 are not enrolled.<sup>62</sup> For individuals with intellectual or developmental disabilities,  
9 Medicaid provides more supportive services to facilitate employment.<sup>63</sup> The role of

1 Medicaid to support individuals with disabilities so that they can remain productive  
2 members of their community cannot be understated.

3 The number of individuals who will be irreparably harmed by the Regulation is  
4 significant. Approximately one-third of working age adults enrolled in Medicaid have  
5 a disability.<sup>64</sup> In 2015 people with disabilities made up 26 percent of SNAP  
6 participants.<sup>65</sup> Blocking or disincentivizing access to medical and nutrition benefits will  
7 result in worse medical outcomes and food insecurity for an already vulnerable  
8 population.

9 **CONCLUSION**

10 The Regulation dramatically increases the likelihood that lawfully present  
11 immigrants and their families will forego health and nutrition benefits to avoid  
12 negatively impacting their immigration status. The harmful impact of this Regulation  
13 will most severely threaten the health and well-being of vulnerable children, pregnant  
14 women, and individuals with disabilities. On behalf of their patients, members, and the  
15 communities they serve, amici curiae urge this Court to grant Plaintiffs’ preliminary  
16 injunction and to prevent further harm and damage to the health of these groups.
