Case No. 3:20-cv-00682-LB

**AMENDED COMPLAINT
 FOR DECLARATORY AND
 INJUNCTIVE RELIEF**

Administrative Procedure Act Case

INTRODUCTION

1
2 1. Plaintiffs the States of California, New York, Colorado, District of Columbia, Maine,
3 Maryland, Oregon, and Vermont (collectively, the States), bring this action to challenge the
4 unlawful agency action by Defendants, the U.S. Department of Health and Human Services
5 (HHS) and Secretary Alex M. Azar, II (collectively, Defendants), that threatens to undermine
6 access to healthcare coverage, specifically safe and legal abortion, and the States' sovereign laws
7 enacted to protect women's constitutional rights. Defendants have unlawfully reinterpreted
8 Section 1303 of the Patient Protection and Affordable Care Act (ACA) and issued an onerous and
9 unnecessary regulation designed to restrict women's constitutionally protected reproductive rights
10 by creating barriers to abortion coverage. In doing so, Defendants seek to frustrate the States'
11 sovereignty by coercing the States to change their policies relating to the protection of abortion
12 care.

13 2. A central feature of the ACA is the requirement that every state establish a "health
14 insurance exchange." Exchanges are marketplaces in which consumers and small businesses can
15 shop for and purchase private health insurance coverage. The ACA gave states the flexibility to
16 develop and host their own exchanges, or let the federal government establish and run exchanges
17 for them. An exchange established by the state itself is a state-based exchange (SBE) and those
18 operated by HHS are federally facilitated exchanges (FFE). In states with FFEs, the exchange
19 may be operated by HHS alone or in conjunction with the state. And some states have exchanges
20 that are SBE-FPs, meaning they are SBEs but use the federal information technology platform,
21 including the federal exchange website www.Healthcare.gov.¹

22 3. States that choose to implement their own exchanges may tailor the exchanges to
23 their state's unique public health priorities, such as ensuring coverage for services required by
24 state laws for its residents. An important aspect of developing its own insurance exchange is a

25
26 ¹ In Plaintiff States, California New York, Colorado, the District of Columbia, Maryland,
27 and Vermont, operate state-based exchanges (SBEs), while Oregon operates a state-based
28 exchange on the federal platform (SBE-FP), and Maine operates a federally facilitated exchange
(FFE). The States represent the diversity contemplated by the ACA, which authorized significant
state flexibility in the operation of the States' health insurance markets.

1 state's ability to define standards for and selecting plans that qualify for participation in its
2 exchange. State exchanges are responsible for annually certifying or recertifying plans to be sold
3 on their exchanges as qualified health plans (also known as QHPs), plans that cover the essential
4 health benefits (EHB) required under the ACA, as well as any benefits mandated by state law
5 (e.g. abortion coverage).

6 4. States have historically retained general police powers to promote and regulate public
7 health. Since states regulate their own healthcare markets and the ACA intentionally respects the
8 power of the States to govern the individual market, the States of California, New York,
9 Colorado, District of Columbia, Maine, Maryland, Oregon, and Vermont all require or encourage
10 the provision of abortion coverage in qualified health plans.

11 5. The States require or allow abortion coverage because it is critical to ensuring that *all*
12 residents have access to comprehensive healthcare services including coverage for abortion. In
13 the States, more than half a million women² are enrolled in, and benefit from, private qualified
14 health plans that offer coverage for abortion services in the States' individual health insurance
15 exchanges. As such, the Rule threatens the States' policy priorities and flexibility authorized by
16 the ACA.

17 6. On December 27, 2019, HHS issued a final rule titled, "Patient Protection and
18 Affordable Care Act: Exchange Program Integrity" (hereinafter Rule) which contains changes to
19 how State Exchanges and health insurance plans segregate consumers' premium payments for
20 abortion coverage under 45 C.F.R. §156.280. Patient Protection and Affordable Care Act;
21 Exchange Program Integrity, 84 Fed. Reg. 71,674 (December 27, 2019) (to be codified at 45
22 C.F.R. pt. 155, 156). HHS contends the Rule is required to better align implementing regulations
23

24 ² This total represents 2019 enrollment data, identifying women of reproductive age,
25 between the ages of 15-49 years old who participate in a qualified health plan that provide
26 abortion coverage, and reaches a total of 509,014 women potentially impacted by the Rule. In the
27 State of California 388,661 women of reproductive age would be at risk of abortion coverage
28 loss; approximately 56,000 in the State of New York; approximately 18,080 in the State of
Colorado; 8,148 in the District of Columbia; approximately 20,000 in the State of Maine; and
36,205 in the State of Maryland. This total does not include the States of Oregon and Vermont,
for which data was not readily available at the time of filing of this complaint.

1 of Section 1303 of the ACA with other extraneous federal restrictions on the use of federal funds
2 for abortion services. However, issuers have been in compliance with those restrictions by
3 creating segregated accounts that could be used only for abortion services. And in prior guidance,
4 HHS endorsed the practice of billing policy holders in a single transaction as a way to comply
5 with the segregated-use requirements. But nearly after a decade since the ACA became law, the
6 Rule would now require issuers (insurance companies) to send separate bills—and collect
7 separate payments from policy holders—of an amount no less than \$1, for the portion of the
8 insurance premium attributable to abortion coverage. These changes violate key provisions of the
9 ACA, the Administrative Procedure Act, and the U.S. Constitution, and could potentially cost the
10 States significant federal matching funds for noncompliance.

11 7. Once implemented, the Rule will require health issuers selling qualified health plans
12 in states that offer abortion coverage to comply with the onerous requirements of sending two
13 separate bills to each policy holder. Similarly, HHS presumes that these changes will also apply
14 to the three State exchanges that currently perform premium billing and payment processing for
15 issuers participating in the individual market. Operationally, the Rule penalizes issuers for doing
16 business in the States—where access to comprehensive reproductive care is protected by state
17 laws that mandate or allow abortion coverage, and in states which have heavily invested in the
18 administration of their own exchange. Further, the Rule disincentivizes issuers from providing
19 abortion coverage in states that do not yet have specific laws restricting it, by creating barriers to
20 doing so. In addition, the Rule will require costly changes to the States' coverage and enrollment
21 policies, imposing new oversight responsibilities on the States' agencies, including state
22 regulators and insurance commissioners.

23 8. In the end, the Rule will create significantly more problems than those HHS
24 purportedly seeks to solve. Contrary to the ACA's requirement of equitable access to healthcare,
25 the Rule complicates access to care. The Rule will increase consumer confusion because those
26 who do not understand the purpose of the two separate bills and payments may inadvertently fail
27 to make complete premium payments on time, putting their coverage at risk of termination.
28 Indeed, HHS concedes the Rule will likely increase consumer confusion. 84 Fed. Reg. 71,686.

1 9. This confusion may result in premium increases or loss of coverage, affecting almost
2 2.6 million enrollees who receive abortion coverage through a qualified health plan in the 11
3 impacted state-based exchanges. 84 Fed. Reg. 71,698. In the States alone, the Rule puts the
4 coverage of almost 2.3 million enrollees in the individual market at risk of coverage termination.³
5 The Rule will have a disparate impact on women and their access to abortion care—a critically
6 time-sensitive and women-specific procedure.

7 10. This is precisely the type of rulemaking that Congress prohibited when it enacted
8 Section 1554 of the ACA. Section 1554 prohibits the Secretary from promulgating any regulation
9 that creates unreasonable barriers to the ability of individuals to obtain appropriate medical care.
10 42 U.S.C. § 18114 (2019). Now, a decade after the passage of the ACA, HHS’s onerous new
11 Rule threatens to rescind a cornerstone of the statute’s enactment—the authority and flexibility
12 granted to states to operate their state-based exchanges to meet the state’s policy priorities.

13 11. Moreover, HHS’s Rule threatens the States’ public fiscs, as noncompliance with the
14 Rule risks millions of federal dollars paid to the States for the administration of health programs.
15 Under the ACA’s financial integrity section, 42 U.S.C. § 18033(a)(4) (2018), HHS may conclude
16 that the States’ inability to comply, or allow issuers to comply, with the separate billing
17 requirements amounts to a “pattern of abuse” from compliance with HHS standards related to
18 Title I of the ACA. If “the Secretary determines that an Exchange has engaged in serious
19 misconduct with respect to compliance with the requirements of, or carrying out of activities
20 required” under the ACA, HHS has the authority to rescind up to one percent (1%) of the federal
21 funding dollars due to a state *under any program administered by HHS*. 84 Fed. Reg. 71,678.

22 12. HHS acknowledges that the ACA “designate[s] the state insurance commissioners as
23 responsible for monitoring, overseeing, and enforcing the provisions in section 1303.” *Id.* at

24 _____
25 ³ Collectively the Plaintiff States reported a total enrollment of 2,270,472 in 2019. This
26 includes 1,513,883 enrollees in the state of California; 271,873 in the state of New York; 18,035
27 in the District of Columbia; 70,987 in Maine’s ACA individual market; 156,963 in the state of
28 Maryland; 148,180 in the state of Oregon; and 25,223 in the State of Vermont, *see* CMS 2019
OEP State-Level Public Use File, accessible at https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/Marketplace-Products/2019_Open_Enrollment, and approximately 65,328 enrollees in plans offering abortion coverage in the State of Colorado.

1 71,691-692 (citing § 18023 and the implementing regulations at § 156.280(e)(5)). Nevertheless,
2 HHS asserts that states do not have “exclusive enforcement authority with respect to all
3 provisions in Section 1303” and warns state-based exchanges, that under the authority granted to
4 it by 42 U.S.C. § 18041(c)(2), “the Secretary may step in to enforce the requirement against the
5 non-compliant issuer,” in place of the exchange itself. *Id.* And HHS hints at now restricting
6 previously afforded state flexibility, reminding “states concerned about enforcement and
7 oversight of these requirements that, under section 1321(c), states may elect not to establish and
8 operate an Exchange, thereby defer[] those responsibilities to HHS.” 84 Fed. Reg. 71,694.

9 13. The States stand to lose millions of dollars annually for the administration of
10 healthcare programs, which depend on federal dollars. Jeopardizing these federal matching
11 dollars would significantly harm the States’ residents and families, as they support critical
12 healthcare programs and public health initiatives. Thus, through the Rule’s onerous requirements
13 and the resulting personal and societal costs, HHS seeks to thwart the States’ laws and policies
14 long committed to women’s reproductive freedom.

15 14. Further, the Rule exacerbates these harms, by imposing these new requirements on an
16 administratively and operationally infeasible timetable that will cause excessive burdens on the
17 States’ health insurance exchanges and health insurance markets. Numerous state-based
18 exchanges commented, including Covered California, Connect for Health Colorado,
19 Connecticut’s Access Health CT, District of Columbia Health Benefit Exchange Authority, New
20 York State of Health, as well as the Attorneys General of California, New York, Oregon,
21 Pennsylvania, and Washington, explaining to HHS that the Rule involved significant
22 administrative complexities, and many raised that “mid-year implementation” of the proposed
23 changes would be “unworkable and burdensome on both states and issuers.” (Comment
24 submitted by Connect for Health Colorado). Blue Shield of California, one of the largest issuers
25 in California, submitted comments estimating that it would take at least 18 months to put these
26 changes into place. (Comment submitted by Blue Shield of California).

27 15. Even after acknowledging commenters’ implementation challenges, HHS’s final Rule
28 requires compliance with these changes by June 27, 2020—after open enrollment has been

1 finalized and mid-plan year. HHS simply states that, “we believe 6 months is sufficient...to
2 implement the administrative and operational changes to billing processes necessary to
3 comply[,]” while acknowledging that some issuers “may seek to exit the individual market in a
4 state” as a result of the Rule. 84 Fed. Reg. at 71,689, 71,690. Ostensibly, “such a short time
5 period to implement the new regime is further evidence that the [Rule] is meant to coerce insurers
6 into dropping abortion coverage.” (Comment of Positive Women’s Network-USA (PWN-USA)
7 on Proposed Rule (Nov. 09, 2018)).

8 16. The States have each taken crucial steps to safeguard women’s access to reproductive
9 healthcare and have made this a policy priority. As mentioned, The States of California, New
10 York, Colorado, District of Columbia, Maine, Maryland, Oregon, and Vermont all require or
11 encourage the provision of abortion coverage in qualified health plans. This commitment to
12 women’s reproductive freedom captures the importance of securing coverage to ensure that
13 individuals have access to all the services they may need and have the option of exercising
14 constitutionally protected rights.

15 17. California has a long history of protecting women’s access to comprehensive
16 reproductive health, including abortion care. The fundamental right to choose to bear a child or
17 choose to obtain an abortion is the official public policy of the State, protected in both the State’s
18 constitution and by statute. *See* Cal. Const., art. I, § 1; Cal. Health & Saf. Code § 123462(b)
19 (Dering 2019). In furtherance of these rights, state law requires that all health plans regulated by
20 the State offer abortion coverage as part of their basic healthcare services. California’s Governor
21 recently issued the California Proclamation on Reproductive Freedom in 2019, reaffirming the
22 State’s commitment to “uphold women’s equality and liberty by protecting their reproductive
23 freedom, educating Californians about their rights to reproductive freedom,” reaffirming
24 reproductive rights “and acting as a model for other states that want to ensure full reproductive
25 freedom for women.”⁴

26
27
28 ⁴ *See* <https://www.gov.ca.gov/wp-content/uploads/2019/05/Proclamation-on-Reproductive-Freedom.pdf>.

1 18. New York has also enacted some of the strongest protections for women’s access to
2 comprehensive healthcare. New York first legalized abortion in 1970, three years before the
3 Supreme Court established the constitutional protections of *Roe v. Wade*. In 2019, New York
4 enacted the Reproductive Health Act, to align state law further with federal law, explicitly
5 providing that comprehensive reproductive healthcare is a fundamental component of every
6 individual’s health, privacy, and equality. N.Y. Pub. Health L. § 2599-aa (2019). Consequently,
7 it is the policy of the state that every individual who becomes pregnant has the fundamental right
8 to choose to carry the pregnancy to term, to give birth to a child, or to have an abortion. *Id.*
9 Thus, New York state law requires that health insurance plans must include abortion coverage,
10 and with the exception of high-deductible plans, must cover abortion care without any cost-
11 sharing.

12 19. Colorado’s laws do not restrict abortion rights and allow issuers participating in
13 Colorado’s state exchange to offer qualified health plans that provide abortion coverage. In 2019,
14 approximately 60 health plans offered on Colorado’s individual insurance marketplace covered
15 abortion.

16 20. The District of Columbia’s laws do not restrict abortion rights and allow issuers
17 participating in the District’s state exchange to offer qualified health plans that provide abortion
18 coverage. All health plans offered on the District’s individual insurance Marketplace cover
19 abortion.

20 21. Maine enacted the Reproductive Privacy Act in 1993, which declares that “[i]t is the
21 public policy of the State that the State not restrict a woman’s exercise of her private decision to
22 terminate a pregnancy before viability.” Me. Rev. Stat. tit. 22, § 1598(1). Maine law requires
23 carriers offering health plans in Maine to provide coverage for maternity services, which is
24 designated as part of an “essential health benefits package.” Me. Rev. Stat. tit. 24-A, § 4320-D
25 (effective March 19, 2019). Maine law further requires a carrier offering a health plan in Maine
26 that provides maternity services to also provide coverage for abortion services. *Id.* § 4320-M
27 (effective September 19, 2019). Maine’s laws thus require all carriers offering health plans on the
28 Marketplace to provide coverage for abortion services.

1 22. Maryland law provides that the state “may not interfere with the decision of a woman
2 to terminate a pregnancy” before viability of the fetus, to protect the woman’s life or health, or if
3 the fetus bears a genetic defect. Md. Code Ann., Health - Gen. § 20-209(b). In addition,
4 Maryland’s Medicaid program covers abortion services for eligible individuals with state-only
5 funds. Md. Cod. Regs. Tit. 10, § 09.02.04(G). Although Maryland does not have a law that
6 requires private health plans to cover abortion services, all health plans offered on the state’s
7 individual insurance marketplace cover abortion.

8 23. Oregon has long been a leader in enacting policies and programs that support access
9 to high-quality reproductive health services. In 2017, Oregon passed the Reproductive Health
10 Equity Act (House Bill 3391), which requires private health insurance plans to cover abortions
11 with no out-of-pocket costs. Specifically, the law requires all health benefit plans offered in the
12 state to provide coverage for abortions and prohibits imposition of “a deductible, coinsurance,
13 copayment or any other cost-sharing requirement on the coverage required by this section.” Or.
14 Rev. Stat. Ann. § 743A.067(2)-(3).

15 24. Vermont passed a Freedom of Choice Act in 2019, *See* 2019 Vt. Laws No. 47,
16 codifying that, “[t]he State of Vermont recognizes the fundamental right of every individual who
17 becomes pregnant to choose to carry a pregnancy to term, to give birth to a child, or to have an
18 abortion.” Vt. State. Ann. tit. 18, § 9493(b). Consistent with Vermont state policy, Vermont has
19 selected an essential health benefit benchmark plan, since 2013, that includes coverage of
20 abortion services.⁵ All individual and small group health plans in Vermont therefore offer
21 coverage for abortion services. As a result, the final rule impacts not a subset of the market, but
22 the entirety of Vermont’s merged individual and small group market.

23 25. The States seek declaratory relief on the grounds that the Rule violates the
24 Administrative Procedure Act (APA), 5 U.S.C § 706, because it is contrary to law, exceeds
25

26 ⁵ The State of Vermont continues to evaluate the impact the Rule will have on consumers
27 in light of the state’s benchmark plan, including ways to mitigate consumers’ coverage
28 termination risks. This too is an added burden imposed by Rule, particularly one that seeks
implementation to be achieved mid plan year.

1 Defendants' authority, and is arbitrary and capricious. Additionally, the Rule is unlawful under
2 the Constitution's Tenth Amendment.

3 **JURISDICTION**

4 26. This Court has jurisdiction pursuant to 28 U.S.C. § 1331 because this case involves a
5 civil action arising under the Constitution and laws of the United States. Further, the Court has
6 jurisdiction under 28 U.S.C. § 1361 because this is an action to compel officers or agencies of the
7 United States to perform a duty owed to Plaintiffs. Jurisdiction is also proper under the judicial
8 review provisions of the APA, 5 U.S.C. § 702.

9 27. An actual controversy exists between the parties within the meaning of 28 U.S.C.
10 § 2201(a), and this Court may grant declaratory relief, injunctive relief, and other appropriate
11 relief pursuant to 28 U.S.C. §§ § 1361, 2201-2202, 5 U.S.C. §§ 705-706, and the Court's
12 equitable powers.

13 28. Defendants' issuance of the Rule on December 27, 2019, constitutes a final agency
14 action and is therefore judicially reviewable within the meaning of the APA. 5 U.S.C. §§ 704,
15 706.

16 **VENUE**

17 29. Venue is proper in the Northern District of California pursuant to 28 U.S.C. § 1391(e)
18 because the State of California and its Attorney General have offices in Oakland, California, and
19 this action seeks relief against the United States, agencies of the United States, and officials
20 acting in their official capacities.

21 **INTRADISTRICT ASSIGNMENT**

22 30. Pursuant to Civil Local Rules 3-5(b) and 3-2(c), assignment to the Oakland Division
23 or San Francisco Division is appropriate because Plaintiff the State of California and its Attorney
24 General maintain offices therein.

25 **PARTIES**

26 31. Plaintiff the State of California, by and through Attorney General Xavier Becerra,
27 brings this action. California is a sovereign state in the United States of America. The Attorney
28

1 General is the chief law enforcement officer of the State and has the authority to file civil actions
2 in order to protect the health and welfare of Californians and advance the State's interest in
3 protecting women's access to reproductive healthcare. Cal. Const., art. V, § 13; Cal. Bus. & Prof.
4 Code § 321. This challenge is brought pursuant to the Attorney General's independent
5 constitutional, statutory, and common law authority to represent the public interest.

6 32. Plaintiff the State of New York, by and through its Attorney General Letitia James,
7 brings this action. New York is a sovereign state in the United States of America. The Attorney
8 General is New York State's chief law enforcement officer and is authorized to advance the
9 State's interest in protecting women's access to reproductive healthcare services.

10 33. Plaintiff the State of Colorado is a sovereign state of the United States of America.
11 The State of Colorado brings this action by and through its Attorney General, Philip J. Weiser.
12 The Attorney General has authority to represent the state, its departments, and its agencies and
13 "shall appear for the state and prosecute and defend all actions and proceedings, civil and
14 criminal, in which the state is a party." Colo. Rev. Stat. § 24-31-101.

15 34. Plaintiff the District of Columbia (the District), by and through its Attorney General
16 Karl A. Racine, brings this action. The District is a municipal corporation empowered to sue and
17 be sued, and is the local government for the territory constituting the permanent seat of the federal
18 government. The Attorney General is the Chief Legal Officer for the District and possesses all
19 powers afforded the Attorney General by the common and statutory law of the District. The
20 Attorney General is responsible for upholding the public interest and has the authority to file civil
21 actions in order to protect the public interest. D.C. Code § 1-301.81.

22 35. Plaintiff the State of Maine, by and through its Attorney General Aaron M. Frey,
23 brings this action. Maine is a sovereign state of the United States of America. The Attorney
24 General of Maine is a constitutional officer with the authority to represent the State of Maine in
25 all matters and serves as its chief legal officer with general charge, supervision, and direction of
26 the State's legal business. Me. Const. art. IX, Sec. 11; Me. Rev. Stat. tit. 5, §§ 191 *et seq.* The
27 Attorney General's powers and duties include acting on behalf of the State and the people of
28 Maine in the federal courts on matters of public interest. The Attorney General has the authority

1 to file suit to challenge action by the federal government that threatens the public interest and
2 welfare of Maine residents as a matter of constitutional, statutory, and common law authority.

3 36. Plaintiff the State of Maryland, by and through its Attorney General Brian E. Frosh,
4 brings this action. Maryland is a sovereign state in the United States of America. The Attorney
5 General is Maryland's chief legal officer with general charge, supervision, and direction of the
6 State's legal business. The Attorney General's powers and duties include acting on behalf of the
7 State and the people of Maryland in the federal courts on matters of public concern. Under the
8 Constitution of Maryland, and as directed by the Maryland General Assembly, the Attorney
9 General has the authority to file suit to challenge action by the federal government that threatens
10 the public interest and welfare of Maryland residents. Md. Const. art. V, § 3(a)(2); 2017 Md.
11 Laws, Joint Resolution 1.

12 37. Plaintiff the State of Oregon, by and through its Attorney General Ellen Rosenblum,
13 brings this action. The State of Oregon is a sovereign state of the United States of America.
14 Attorney General Rosenblum is the Chief Law Officer of Oregon and is empowered to bring this
15 action on behalf of the State of Oregon and its affected state agencies. Or. Rev. Stat. §§ 180.060,
16 180.210, 180.220.

17 38. Plaintiff the State of Vermont, by and through its Attorney General, Thomas J.
18 Donovan, brings this action. Vermont is a sovereign state in the United States of America. The
19 Attorney General is the state's chief law enforcement officer and is authorized to pursue this
20 action pursuant to Vt. Stat. Ann. tit. 3, §§ 152 & 157.

21 39. The States have an interest in ensuring women's reproductive healthcare is both
22 available and accessible. Healthcare is one of the primary powers of the States. Moreover, under
23 Section 1303, states are primarily responsible, through their insurance commissioners and
24 regulating bodies, for the regulation of health insurance. Defendants' actions interfere with this
25 authority.

26 40. The States rely on Defendants' compliance with both procedural and substantive
27 requirements of the APA so they can meaningfully participate in an impartial and public decision-
28 making process that is consistent with the ACA's requirements of equitable access to healthcare.

1 This is especially true in matters related to federal regulatory schemes and agency activities that
2 may have significant adverse impacts on access to comprehensive healthcare, including access to
3 abortion coverage.

4 41. Each State is aggrieved by the actions of Defendants and has standing to bring this
5 action because of the injury to its state sovereignty caused by Defendants' issuance of the illegal
6 Rule, including immediate and irreparable injuries to its sovereign, quasi-sovereign, and
7 proprietary interests. In particular, the States will suffer concrete and substantial harm because
8 the Rule frustrates the States' public health interests by encumbering women's access to abortion
9 services made available through qualified health plans.

10 42. Further, the States are aggrieved by the actions of Defendants and have standing to
11 bring this action because of the injuries that will be caused to the States by the implementation
12 and enforcement of Defendants' Rule creating unnecessary and costly requirements that will
13 likely limit women's ability to obtain abortion services. The States will suffer concrete and
14 substantial harm because they will incur unnecessary administrative costs caused by the Rule's
15 onerous burdens on the States' exchanges and regulatory agencies. The Rule will also cause the
16 States additional injuries associated with resulting unwanted pregnancies and the related attendant
17 harms and increasing uncompensated care costs for entire families stemming from the inadvertent
18 loss of healthcare coverage for failure to pay the separate bill.

19 43. Defendant, Alex M. Azar, II, is Secretary of HHS and is sued in his official capacity.
20 Secretary Azar has responsibility for implementing and fulfilling HHS's duties under the
21 Constitution and the APA.

22 44. Defendant, Seema Verma, is Administrator of the Centers for Medicare and Medicaid
23 Services (CMS) and is sued in her official capacity. Administrator Verma has responsibility for
24 implementing and fulfilling CMS's duties under the Constitution and the APA.

25 45. Defendant, HHS, is a federal agency of the United States government and bears
26 responsibility, in whole or in part, for the acts complained of in this Complaint. CMS is a federal
27 agency and an entity within HHS.

28

FACTUAL AND PROCEDURAL BACKGROUND

I. THE ACA AND SECTION 1303 ABORTION FUNDING RESTRICTIONS

46. In 2010, Congress enacted the ACA, landmark legislation that enabled more than 20 million Americans to gain health coverage. The ACA vastly increased coverage by expanding the traditional Medicaid program, providing subsidies to lower the cost of coverage, and created effective health insurance exchanges to allow consumers a marketplace with choices for private health insurance coverage. Among its many reforms, the ACA prohibited issuers from charging people with pre-existing health conditions, such as pregnancy, more for care based on their health status, charging women more than men, or denying people the coverage they need. The law created consumer protections in the private insurance market, limiting issuers' ability to set annual lifetime limits on total benefits or rescind coverage, except in cases of fraud. And issuers were required to cover dependents up to age 26 under their parents' health plans, include annual out-of-pocket limits, and provide rebates to the insured if total benefits do not exceed statutory shares of premiums received. The ACA improved the quality, accessibility, and affordability of health insurance coverage both for people who were already insured and for the previously uninsured. *Nat'l Fed'n of Indep. Bus. v. Sebelius*, 567 U.S. 519, 538 (2012) (*NFIB*); 42 U.S.C. § 18091(2)(C), (F) & (G) (2019).

47. To ensure even more broad-based access to health insurance, the ACA included key provisions, primarily Section 1554 and Section 1557, to create and safeguard parity in healthcare access. Among other things, the ACA's Section 1554 prohibits the Secretary of HHS from promulgating any regulation that creates unreasonable barriers to the ability of individuals to obtain appropriate medical care, impedes timely access to healthcare, or limits the availability of treatment for the full duration of a patient's medical needs. 42 U.S.C. § 18114.

48. Section 1557 of the ACA established the first federal law to prohibit a broad range of health programs or activities—including the growing health insurance exchange—from discriminating against individuals on the basis of any classification listed under different federal civil rights statutes, such as race, color, national origin, and sex. 42 U.S.C. § 18116 (2019).

1 49. These provisions were designed to guarantee that the benefits of the ACA—expanded
2 healthcare coverage, patient protections, and reductions to rising healthcare costs—were
3 attainable by all. Together, Sections 1554 and 1557 specifically addressed the numerous ways in
4 which regulatory schemes might deny these opportunities and protections to certain vulnerable
5 groups, such as women, those with preexisting conditions, and low-income communities of color.

6 50. The ACA’s comprehensive transformation of the country’s healthcare system
7 contemplated the important issue of abortion coverage. In enacting the ACA, Congress struck a
8 balance between maintaining restrictions on federal funding for abortion, while ensuring that
9 states had flexibility to permit coverage in the private market. Most relevant to these restrictions
10 is the Hyde Amendment, a restriction on the use of federal Medicaid funds for abortion services,
11 in the annual appropriations legislation that funds the activities and services provided by HHS.
12 The Hyde Amendment allows for certain, limited exceptions for the termination of pregnancies
13 that are the result of rape or incest, or if a woman suffers from a life-threatening physical
14 condition caused by or arising from the pregnancy itself, as certified by a physician. *See* 42
15 C.F.R. §§ 441.202, 441.203, and 441.206.

16 51. The ACA’s implementing regulations, 45 C.F.R. Parts 155 and 156, established
17 certain standards for the creation and regulation of exchanges and participating health issuers.
18 These regulations authorized HHS to oversee exchange program compliance with quality
19 standards related to Title I of the ACA to ensure their financial integrity, including the authority
20 to conduct investigations and annual audits.

21 52. And through Section 1303, Congress included additional standards that prohibited
22 using federal funds, specifically federal advance premium tax credits (APTCs) or cost-sharing
23 reductions (CSRs), to pay for abortion coverage. In Executive Order No. 13535, President
24 Obama established that the ACA maintains current Hyde Amendment restrictions governing
25 abortion policy and extends those restrictions to the newly created health insurance exchanges.
26 75 Fed. Reg. 15,599 (Mar. 29, 2010). Since its inception, Section 1303 has required separate
27 accounting and transparency requirements for coverage of abortion services (for which federal
28

1 funding is prohibited), provided by qualified health plans sold through the individual health
2 insurance exchanges.

3 53. Section 1303 grants significant latitude to state and private issuers. First, the section
4 recognizes states' sovereignty in the regulation of healthcare and provides flexibility for states to
5 make the decision about abortion coverage provided through their respective exchanges. Second,
6 the section sets special rules to allow participating issuers the option of offering such coverage in
7 qualified health plans, but prohibits the use of federal funds to pay for abortion services, "based
8 on the law as in effect as of the date that is six months before the beginning of the plan year
9 involved," unless the pregnancy is a result of rape, incest, or would endanger a woman's life. *See*
10 Patient Protection and Affordable Care Act, Pub. L. 111-148, § 1303, 124 Stat. 119, 896; 42
11 U.S.C. § 18023 (2019).

12 54. Consequently, since the implementation of health insurance exchanges under the
13 ACA, qualified health plan issuers may not use federal exchange subsidies, specifically APTCs or
14 CSRs, to pay for otherwise legal abortion services for which federal funding is prohibited. 42
15 U.S.C. § 18023(b)(2)(A).

16 55. Section 1303 provides that if a qualified health plan includes—or is required to
17 include—coverage of abortion services, issuers must charge all policy holders at least one dollar
18 (\$1) per month for the premium attributable to abortion services, which must then be deposited
19 and maintained in a separate allocation amount. The remainder of the insurance premium not
20 related to abortion services must be deposited and maintained in a separate account. 42 U.S.C. §
21 18023(b)(2)(B)(i)-(ii) and (b)(2)(C)-(b)(2)(D). Further, issuers are required to provide notice to
22 enrollees of the qualified health plan's inclusion of abortion coverage, "only as part of the
23 summary of benefits and coverage explanation, at the time of enrollment, of such coverage." *Id.*
24 § 18023(b)(3)(A). Finally, the statute assigns State health insurance commissioners the task of
25 ensuring that issuers of qualified health plans comply with requirements to segregate exchange
26 plan funds. *Id.* § 18023(b)(2)(E).

27 56. In 2014, only a few months after the implementation of Section 1303 in the individual
28 market, and amid the ongoing development of state-based and federally facilitated exchanges, a

1 Government Accountability Office (GAO) report identified some inconsistencies regarding the
2 implementation of Section 1303. The GAO conducted a national review of state with no laws
3 restricting abortion coverage, and rested its report on an examination of a sample of only eighteen
4 qualified health plan issuers in ten states where qualified health plans cover abortion. Of these,
5 the report found that two failed to collect the statutory minimum of \$1 per enrollee per month,
6 four failed to include notices of abortion coverage, and most did not collect payments as
7 regulations then allowed—by sending a bill itemizing the separate payments or by sending
8 separate bills for the coverage.

9 57. In 2015, HHS responded to the GAO report with a final rule, which identified several
10 alternatives issuers could pursue to satisfy the statutory requirements of Section 1303. HHS
11 Notice of Benefit and Payment Parameters for 2016, 80 Fed. Reg. 10,750, at 10,840 (Feb. 27,
12 2015). Issuers were either to (1) send the enrollee a single monthly bill that separately itemizes
13 the premium amount for abortion services; (2) send a separate monthly bill for these services; or
14 (3) send the enrollee a notice at or soon after the time of enrollment that the monthly bill includes
15 a separate charge for such services and specify the charge. *Id.* In October 2017, CMS's Center
16 for Consumer Information and Insurance Oversight (CCIIO) issued a bulletin that again listed
17 these same options as ways for issuers to comply with the segregated funding requirements.⁶

18 58. To date, HHS and CMS have issued no reports of complaints regarding any violations
19 of Section 1303 or the misuse of federally appropriated funds for abortion services or coverage.

20 59. More broadly, the enactment of the ACA, Sections 1554, 1557, and 1303 maintain
21 current federal restrictions governing abortion policy, but nevertheless preserve the longstanding
22 flexibility afforded to the States related to women's reproductive freedom and sets national goals
23 for expanding access to affordable healthcare coverage.

24 **II. THE STATES HAVE ENACTED LAWS AND POLICIES PROTECTING ACCESS TO** 25 **ABORTION CARE**

26
27
28 ⁶ <https://www.cms.gov/CCIIO/Resources/Regulations-and-Guidance/Downloads/Section-1303-Bulletin-10-6-2017-FINAL-508.pdf>

1 60. The States have a sovereign interest in the creation and enforcement of a legal code.
2 Pursuant to these interests, the States have grounds to challenge HHS’s actions because the Rule
3 undermines their sovereignty and threatens their authority to regulate matters that the States
4 control by frustrating enforcement of state laws and policies aimed at protecting access to
5 abortion care.

6 **A. California**

7 61. California laws protect a woman’s right to healthcare and specifically protect a
8 women’s right to abortion. In 1972, California voters amended the state Constitution to include a
9 right of privacy among the inalienable rights protected in the State. Cal. Const. Art. I, § 1; *Chico*
10 *Feminist Women’s Health Ctr. v. Butte Glenn Med. Soc’y*, 557 F. Supp. 1190, 1201-1202 (E.D.
11 Cal. 1983) (citing *White v. Davis*, 13 Cal. 3d 757 (1975)). The right to privacy under article I,
12 section 1, provides “all women in this state rich and poor alike possess a fundamental
13 constitutional right to choose whether or not to bear a child.” *Comm. to Defend Reprod. Rights v.*
14 *Myers*, 29 Cal. 3d 252, 262 (1981). Accordingly, state law confirms that private parties cannot
15 interfere with the right to procreative choice under article I, section 1. *Chico*, 557 Supp. at 1202-
16 03; *Hill v. Nat’l Collegiate Athletic Ass’n*, 7 Cal. 4th 1, 20 (1994). In addition, the constitutional
17 right of a woman to decide whether to bear a child or terminate a pregnancy, guaranteed under
18 article I, section 1, is also protected from State interference. *Chico*, 557 F. Supp. at 1202; *Myers*,
19 29 Cal. 3d at 284.

20 62. Additional state laws track these constitutional protections. The Reproductive
21 Privacy Act of 2002 (RPA) declared as state public policy that, “[e]very woman has the
22 fundamental right to choose to bear a child or to choose and to obtain an abortion.” Cal. Health &
23 Saf. Code § 123462(b). The Reproductive Privacy Act expressly provides that “[t]he state may
24 not deny or interfere with a woman’s right to choose or obtain an abortion” Cal. Health &
25 Saf. Code § 123466. As a result, in California, all health plans are required to cover abortion
26 services. *See Missionary Guadalupanas of Holy Spirit Inc. v. Rouillard*, 38 Cal. App. 5th 421,
27 427–28 (Ct. App. 2019), review denied (Nov. 20, 2019) (finding that “[b]ecause California law
28 guarantees every woman the right to choose whether to bear a child or obtain an abortion, the

1 only legally tenable interpretation of the law is that abortions are basic health care services, which
2 health care service plans are required to cover.”).

3 **B. New York**

4 63. On January 22, 2019, New York State signed into law the Reproductive Health Act,
5 which legalizes abortion at any time “when necessary protect the woman’s life or health.”⁷ The
6 Act updates New York State law to address “constitutional flaws and recognize a woman’s
7 fundamental right to access safe, legal abortion. The bill moved abortion from the Penal Law to
8 the Public Health Law, which removes longstanding harmful and burdensome barriers to
9 accessing reproductive healthcare and protects New Yorkers against future Federal intrusion.” *Id.*
10 The Reproductive Health Act is codified in N.Y. Pub. Health L. § 2599-aa (2019). Additionally,
11 New York Insurance Law §§ 3216(l), 4304(l), 4306-h, 4328(b)(1) provides that plans, including
12 those participating on the New York State of Health, New York’s health plan exchange, cover
13 ambulatory patient services and prescription drugs. New York regulation prohibits health plans
14 from excluding coverage by type of illness, accident, treatment, or medical condition except as
15 expressly permitted in the regulation. *See* N.Y. Comp. Codes R. & Regs. tit. 11, § 52.16(c).
16 Medically necessary abortion services are not listed in the regulation and therefore cannot be
17 excluded as further clarified in § 52.16(o).

18 **C. Colorado**

19 64. Although Colorado does not have a law that requires private health plans to cover
20 abortion services, Colorado’s laws do not restrict abortion coverage and allow issuers
21 participating in Colorado’s state exchange to offer qualified health plans that provide abortion
22 coverage. Colorado’s individual insurance marketplace provides access to numerous plans that
23 cover abortion.

24 65. Moreover, Colorado protects a woman’s right to abortion. Colorado repealed its laws
25 criminalizing abortion in 2013 (Colo. Rev. Stat. §§ 18-6-101—105) and Colorado specifically
26

27
28 ⁷ <https://nyassembly.gov/Press/files/20190122.php>

1 prohibits the prosecution of a woman for any act or any failure to act with regard to her own
2 pregnancy (Colo. Rev. Stat. § 18-3.5-102).

3 **D. District of Columbia**

4 66. Although the District does not have a law that requires private health plans to cover
5 abortion services, the District’s laws do not restrict abortion coverage and allow issuers
6 participating in the District’s state exchange to offer qualified health plans that provide abortion
7 coverage. In fact, all health plans offered on the District’s individual insurance marketplace
8 cover abortion.

9 67. Moreover, the District of Columbia protects a woman’s right to abortion. A 1901 law
10 that criminalized abortion except to preserve the life or health of the mother (D.C. Code § 22-
11 101) was repealed in 2003 along with other outdated statutes. The Committee Report on Bill 15-
12 79, the “Elimination of Outdated Crimes Amendment Act of 2003,” noted that the law was
13 “outdated and unnecessary because abortion is not appropriate for criminal sanction, particularly
14 in light of the U.S. Supreme Court’s decision in *Roe v. Wade*.”

15 **E. Maine**

16 68. Maine’s Reproductive Privacy Act declares that “[i]t is the public policy of the State
17 that the State not restrict a woman’s exercise of her private decision to terminate a pregnancy
18 before viability.” Me. Rev. Stat. tit. 22, § 1598(1). Consistent with this state policy, all health
19 plans as defined in Maine’s Insurance Code are required to cover abortion services. Me. Rev.
20 Stat. tit. 24-A, §§ 4320-D & 4320-M.

21 69. Maine has taken recent action to support women’s reproductive freedom, by enacting
22 a new law to protect insurance coverage of all forms of reproductive healthcare. In 2019, Maine
23 enacted a requirement that the State pay for abortion services for Medicaid eligible women, which
24 services are not federally approved Medicaid services. Me. Rev. Stat. Ann. tit. 22, § 3196
25 (effective September 19, 2019). In the same legislative vehicle, the state enacted a requirement
26 that all health plans offering maternity services shall also provide coverage for abortion services,
27 with a possible exemption for a religious employer as defined in 26 U.S.C. § 3121(w)(3)(A). Me.
28 Rev. Stat. Ann. tit. 24-A, § 4320-M.

1 **F. Maryland**

2 70. Maryland has long offered strong protections for women’s rights to access healthcare.
3 Women’s abortion rights have been firmly protected under Maryland law since voters in 1992
4 overwhelmingly passed a referendum question protecting a woman’s right to abortion. Richard
5 Tapscott, *MD Backs Measure on Abortion Rights*, Washington Post (Nov. 4, 1992)⁸; Md. Code
6 Ann., Health Gen. § 20-209. The State of Maryland may not interfere with the decision of a
7 woman to terminate a pregnancy: (1) before the fetus is viable; or (2) at any time during the
8 pregnancy if the termination is necessary to protect the life or health of the woman; or the fetus is
9 affected by genetic defect or serious deformity or abnormality. Md. Code Ann., Health Gen. § 2-
10 209(b). Maryland’s recognition of a woman’s right to abortion is further reflected by Maryland’s
11 decision to voluntarily provide state-funded abortion coverage for eligible women in its Medicaid
12 program. Md. Code Regs. 10.09.02.04G. Maryland also offers abortion services to incarcerated
13 women. Md. Code Ann., Correctional Srvs. § 9-601(j)(2)(v).

14 71. In Maryland abortion coverage is part of the essential health benefits package,
15 required of all non-grandfathered individual and small group plans sold on Maryland’s Health
16 Benefit Exchange, and all individual qualified health plans cover abortions.

17 **G. Oregon**

18 72. Oregon also recognizes the critical nature of access to comprehensive, high quality
19 reproductive health care for its residents. In 2017, Oregon passed the Reproductive Health Equity
20 Act (House Bill 3391), which requires private health insurance plans to cover abortions with no
21 out-of-pocket costs and bans discrimination in the delivery of reproductive health services. The
22 law prohibits a public body, including any state or local government agency or employee of the
23 agency from interfering with or restricting benefits, facilities, services or information regarding a
24 woman’s right to choose to terminate a pregnancy. Or. Rev. Stat. Ann. § 659.880. Specifically,
25 the Reproductive Health Equity Act requires all health benefit plans offered in the state to provide
26 coverage for abortions and prohibits the imposition of “a deductible, coinsurance, copayment or

27 ⁸ <https://www.washingtonpost.com/archive/politics/1992/11/04/md-backs-measure-on-abortion-rights/cb000417-7fed-430a-be69-79203fcd2de2/>.
28

1 any other cost-sharing requirement on the coverage required by this section.” Or. Rev. Stat. Ann.
2 § 743A.067(2)-(3).

3 **H. Vermont**

4 73. Vermont also moved to protect abortion rights by enacting the Freedom of Choice
5 Act in 2019. *See* 2019 Vt. Laws No. 47. As the legislature explained its intent: “Currently
6 Vermont does not impose legal restrictions on the right to abortion. . . . The General Assembly
7 intends this act to safeguard these existing rights to access reproductive health services in
8 Vermont by ensuring those rights are not denied, restricted, or infringed by a governmental
9 entity.” *Id.* § 1. And, as codified: “The State of Vermont recognizes the fundamental right of
10 every individual who becomes pregnant to choose to carry a pregnancy to term, to give birth to a
11 child, or to have an abortion.” Vt. State. Ann. tit. 18, § 9493(b).

12 74. The act further provides: “A public entity shall not . . . interfere with or restrict, in
13 the regulation or provision of benefits, facilities, services, or information, the choice of a
14 consenting individual to terminate the individual’s pregnancy.” Vt. Stat. Ann. tit. 18, § 9497(2).
15 Likewise, “A public entity shall not . . . interfere with or restrict, in the regulation or provision of
16 benefits, facilities, services, or information, the choice of a health care provider acting within the
17 scope of the health care provider’s license to terminate or assist in the termination of a patient’s
18 pregnancy.” *Id.* § 9497(4). The statute further provides a private right of action against a public
19 entity for any “individual injured as a result of a violation of this chapter,” including costs and
20 attorney’s fees as well as injunctive relief. *Id.* § 9498.

21 75. Vermont also aims to protect women’s reproductive freedom through its healthcare
22 exchange. As such, since 2013, Vermont has selected an essential health benefit benchmark plan
23 that includes coverage of abortion. All individual and small group health plans in Vermont
24 therefore offer coverage of abortion services.

25 **III. HHS’S ILLEGAL RULE RESTRICTS ACCESS TO ABORTION COVERAGE AND HARMS** 26 **THE STATES AND THEIR RESIDENTS**

27 76. Defendants’ new Rule represents a capricious intent to frustrate the status quo by
28 imposing upon issuers and state exchanges unnecessary separate billing requirements. Section

1 1303 of the ACA prohibits the use of federal funds for abortion services, and current
2 implementing regulations provided issuers with various methods of complying with the statute's
3 requirements by providing appropriate notice, sending single bills with itemized amounts, and
4 creating segregated accounts that could only be used to pay for abortion services. As discussed
5 above, both in 2015 and 2017, HHS guidance specifically allowed issuers either to: (1) send the
6 enrollee a single monthly bill that separately itemizes the premium amount for abortion services;
7 (2) send a separate monthly bill for these services; or (3) send the enrollee a notice at or soon after
8 the time of enrollment that the monthly bill includes a separate charge for such services and
9 specify the charge. *See* ¶55.

10 **A. Summary of the Rule's Separate Billing Requirements**

11 77. The Rule changes the statute's implementing regulations, 45 C.F.R. § 156.280, in two
12 significant ways. First, the Rule requires issuers to separately bill for the portion of the premium
13 attributable to abortion services (an amount no less than \$1). Second, the Rule requires a separate
14 payment from consumers. Issuers can no longer send a single monthly invoice or bill that
15 itemizes the separate amount for abortion services, or notify enrollees as part of the summary of
16 benefits and coverage explanation at the time of enrollment. Instead, issuers will need to send a
17 separate monthly bill, either by mail (in an envelope containing two separate bills) or
18 electronically (in two separate emails), to each policy subscriber. And consumers would be
19 instructed to no longer pay the premium total in one payment but must pay each bill separately,
20 either by separate paper checks or by two electronic transactions.

21 78. If implemented and enforced, HHS's new Rule will unnecessarily disrupt the way in
22 which issuers that provide abortion coverage bill for healthcare coverage in the States, by forcing
23 an irrational and onerous regulatory scheme that singles out and limits access to a critical
24 women's healthcare procedure—abortion.

25 79. Further, the final Rule will allow issuers to modify the benefits of their qualified
26 health plan, either at the time of enrollment or during a plan year, to effectively allow enrollees to
27 opt out of abortion coverage by not paying the separate bill for such services. This opt out policy
28 was neither included in the proposed rule, nor made available for notice-and-comment prior to its

1 inclusion in the final Rule. And unlike the accelerated six-month compliance grace period for
2 separate billing changes to § 156.280(e)(2), this change will become effective on February 25,
3 2020. 84 Fed. Reg. 71,687.

4 80. HHS is essentially *expediting* the Rule’s end goal of circumscribing access to
5 abortion, by instituting a policy of non-enforcement against issuers that allow policy holders to
6 opt out of the otherwise applicable and substantive requirement to include abortion coverage as a
7 benefit in their qualified health plan. HHS intends to disincentivize abortion coverage by
8 encouraging issuers to permit policy holders to modify the benefits *required* in their qualified
9 health plan and remove the abortion coverage benefit by simply choosing not to pay the separate
10 bill of \$1. 84 Fed. Reg. 71,686. No other health benefit can be excised from the policy in this
11 manner. This non-enforcement policy demonstrates HHS’s capriciousness and disregard for state
12 laws that require abortion coverage. It prompts unnecessary consumer confusion about what they
13 are opting out of and leaves many affected issuers in states that require abortion coverage with an
14 illusory option not available to them unless issuers choose to violate their respective state laws.

15 81. While HHS indicates that issuers must take appropriate measures to ensure that non-
16 payment is not accidental due to unfamiliarity with the Rule’s changes, by providing a policy
17 holder with the opportunity to check a box on their bill, or pushing a button on their online bill—
18 confusion as to why this is necessary or an option will nevertheless result. *Id.* at 71,687.
19 Additionally, “an opt-out [by a policy holder] would be effective for the remainder of the benefit
20 year,” because they “would not be allowed to retract their opt-out decision and reinstate
21 coverage” by similarly choosing to simply opt back in and pay \$1. *Id.* at 71,687. The policy
22 holder’s decision to opt out of that coverage would apply to all persons in the enrollment group
23 under the policy, including dependents (such as adult children up to the age of 26) and spouses.
24 *Id.*

25 82. This represents an assault on the States’ right to prioritize and mandate procreative
26 choice and infringes on the enrollee’s ability to obtain comprehensive health services. The States
27 could have voiced such concerns with HHS’s new non-enforcement policy related to the
28 discretionary opt out alternative granted to issuers, but none were presented the opportunity for

1 notice-and-comment during the proposed rule’s comment period. In fact, the States could have
2 raised that this policy is irrational, as it is not mandatory, and it is not a viable option for states
3 with abortion coverage mandates. Nor could this be a logical outgrowth of the proposed rule’s
4 changes or submitted comments, because the States could not have seriously contemplated this as
5 a viable option for issuers in their states, much less mid-plan year. At bottom, the Rule serves to
6 actively impede the provision of abortion services in the States.

7 83. HHS’s stated goal in promulgating this Rule is to “better align with the intent of
8 section 1303 of the PPACA.” 84 Fed. Reg. 71,685. But, HHS wholly fails to provide an
9 adequate justification for this change. Nowhere in the Rule does HHS identify any evidence or
10 reports demonstrating that federal funds, through advance premium tax credits, cost-sharing
11 reductions or otherwise, have been inappropriately used to pay for the provision of abortion
12 services in violation of Section 1303. And nowhere does HHS indicate that the department has
13 conducted any due diligence in renewing or revisiting the five-year old GAO findings of 2014.
14 HHS simply states that the Rule will address remaining issuer compliance issues, “if any,
15 previously identified” in the GAO report, and that “regardless of whether there are ongoing
16 compliance issues,” its primary goal is to “better align” regulatory requirements with the statute.
17 *Id.* at 71,692.

18 84. The real misalignment lies with HHS’s unsupported justification for the changes in
19 the Rule. HHS even offers up—after-the-fact—numerous commenters’ concerns regarding the
20 transparency of qualified health plans and coverage of abortion services as evidence to justify
21 implementation of the Rule in only six months. Instead, HHS claims additional delay would be
22 “imprudent,” “given that [HHS is] now aware of these consumer concerns.” *Id.* at 71,690.

23 85. Abating consumers’ speculative concerns about transparency is yet another purported
24 basis for HHS’s opt out policies that issuers could develop as early as February 25, 2020, and
25 flatly constitutes capricious rulemaking. Indeed, the Rule represents unreasonable agency action
26 in search of a problem to implement regulatory burdens that solely frustrate the provision of
27 abortion services.
28

1 **B. The Rule Exceeds Statutory Authority by Imposing Unreasonable Burdens**
2 **on the Provision of Abortion Coverage**

3 86. Established canons of statutory interpretation render the Rule an unreasonable
4 exercise of authority by HHS. The Rule seeks to amend the implementing regulations of Section
5 1303, by adding § 156.280 (e)(2)(ii)-(iii), requiring qualified health plans to:

6 (A) *Send to each policy holder of a QHP [qualified health plan] monthly bills for*
7 *each of the amounts specified in paragraphs (e)(2)(i)(A) and (B) of this section,*
8 *either by sending separate paper bills which may be in the same envelope or*
9 *mailing, or by sending separate bills electronically, which must be in separate*
10 *emails or electronic communications; and*

11 (B) Instruct the policy holder to pay each of the amounts specified in paragraphs
12 (e)(2)(i)(A) and (B) of this section through separate transactions. Notwithstanding
13 this instruction, if the policy holder fails to pay each of these amounts in a separate
14 transaction as instructed by the issuer, the issuer may not refuse the payment and
15 initiate a grace period or terminate the policy holder's QHP coverage on this basis.

16 (iii) Deposit all such separate payments into separate allocation accounts as
17 provided in paragraph (e)(3) of this section. In the case of an enrollee whose
18 premium for coverage under the QHP is paid through employee payroll deposit,
19 the separate payments required under paragraph (e)(2)(i) of this section shall each
20 be paid by a separate deposit.

21 84 Fed. Reg. 71,710 (italicized for emphasis).

22 87. The Rule cannot be reconciled with either the text or purpose of Section 1303.

23 88. The statute's plain text is clear. Section 1303(a) provides that any state may elect to
24 prohibit or authorize abortion coverage. 42 U.S.C. § 18023(a). Subsection (b) establishes
25 "special rules relating to coverage of abortion services" that involve the "prohibition on the use of
26 Federal funds" in state-based and federally facilitated exchanges. § 18023(b)(1)-(2). While
27 Section 1303(B) requires that payments be collected and deposited in separate accounts to ensure
28 separate allocation, it does not concern itself with *how* the payments are collected from enrollees.
The import of Section 1303 is rather, how federal funds (attributable to essential health benefits
and possibly subsidized by premium tax credits) are spent, because these are prohibited from
being commingled or *spent* on abortion services.

1 89. In addition, by statute, qualified health plans that provide abortion services are
2 required to notify enrollees “*only* as part of the summary of benefits and coverage explanation, *at*
3 *the time of enrollment* of such coverage.” 42 U.S.C. § 18023(b)(3)(A). In spite of the statutory
4 limitation, the Rule requires issuers to provide additional notice related to the provision of
5 abortion coverage within a qualified health plan. Under the new Rule and contrary to the statute’s
6 instruction, issuers are required to notify enrollees on an on-going monthly basis of their abortion
7 coverage through the separate bills. The 2015 final regulations observed that section 1303 did not
8 mandate a monthly notice, explaining that section 1303 allows, but does not require a qualified
9 health plan issuer to identify the separate premium for abortion services *on the monthly premium*
10 *bill* in order to comply with the separate payment requirement. 80 Fed. Reg. 10750, at 10840
11 (Feb. 27, 2015).

12 90. Moreover, Section 1303’s notice provision states that notice “*shall provide*
13 *information only* with respect to *the total amount of the combined payments* for services.” 42
14 U.S.C. § 18023(b)(3)(B) (emphasis added). It does not state that separate amounts for each
15 service covered by the plan shall identified. Therefore, not only is notice required only at the
16 time of enrollment, but it is also limited to the total amount of the combined premium payments
17 for services.

18 91. The purpose of the statute is clear: to ensure that funds collected are directed to, and
19 maintained in, segregated accounts to guarantee that any payment for abortion services are made
20 explicitly with premium payments collected for such services.

21 92. Plainly put, the Rule’s new provisions requiring separate billing and separate
22 payments for abortion coverage do little to mitigate the risk of how issuers treat abortion and non-
23 abortion related funds. Rather, the purpose of Section 1303 lies in the establishment of the
24 segregated accounts and funds that are used to pay for abortion services. HHS’s new Rule will
25 merely increase the costs of abortion coverage for issuers, State exchanges, and individuals.

26 93. The Rule, if implemented, would expand the requirement that issuers “collect”
27 separate payments beyond statutory requirements. Section 1303 of the ACA and § 156.280 do
28 not specify—and need not specify—the method an issuer must use to comply with the separate

1 payment requirement. The previous regulations make clear that Section 1303 may be satisfied in
2 a number of ways, discussed above in paragraph 57.

3 94. Section 1303 itself confirms this. The provision relevant to the Rule’s promulgation
4 is titled, “[p]rohibition *on the use* of [f]ederal funds” which specifies that “the issuer of the plan
5 shall not *use* any amount attributable to” federal dollars, specifically in the form of ACA
6 subsidies like advanced premium tax credits or cost-sharing reductions to pay for abortion
7 services. 42 U.S.C. § 18023(b)(2)(A) (emphasis added). Section 1303 is primarily concerned
8 with the use of these funds, not the method of collecting premium payments, and such added
9 requirements fall outside of the agency’s authority. Moreover, the changes to the implementing
10 regulations at § 156.280(e)(2) are related to the provision in the statute concerned with the
11 “[e]stablishment of allocation accounts,” under § 18023(b)(2)(B)(i), which is meant to ensure that
12 premiums are segregated to pay for corresponding services.

13 95. A faithful reading of Section 1303 demonstrates that Congress’s principal goal was
14 the segregation of accounts to ensure that federal funds are not used to pay for otherwise legal
15 abortion services. The means by which the issuer acquires these premium payments from the
16 plan enrollee or the policy subscriber is irrelevant.

17 96. HHS’s Rule is contrary to the text, the history, and purpose of Section 1303, because
18 it imposes additional requirements in a manner that plainly exceeds Section 1303’s statutory
19 authority.

20 **C. The Rule is Contrary to the ACA**

21 97. The Rule creates unreasonable and unnecessary barriers to access healthcare coverage
22 and unjustifiably restricts women’s access to reproductive healthcare—directly undermining the
23 ACA itself.

24 **1. The Rule is Contrary to Section 1554 of the ACA**

25 98. The Rule also conflicts with Section 1554, which explicitly prohibits the Secretary of
26 HHS from promulgating “any regulation” that limits access to healthcare services. HHS may not,
27 unless expressly authorized in the ACA, promulgate any regulations that “(1) creates any
28 unreasonable barriers to the ability of individuals to obtain appropriate medical care; (2) impedes

1 timely access to health care services; ... or (6) limits the availability of health care treatment for
2 the full duration of a patient’s medical needs.” 42 U.S.C. §18114. Section 1303 contains no
3 express authorization to limit access to healthcare services, as explained above, its only function
4 is to ensure payment for certain abortion services is appropriately segregated and tracked.

5 99. This prohibition extends to any health program or activity, any part of which is
6 receiving Federal financial assistance. HHS has failed to examine the Rule’s inconsistency with
7 Section 1554, despite the fact that numerous commenters pointed to HHS’ limitations under
8 Section 1554. The Rule’s onerous requirements, “would clearly create new, unreasonable
9 barriers to obtaining health care by causing people to lose insurance coverage,” and thus access to
10 actual services. (Comments submitted by the American Civil Liberties Union (ACLU), Planned
11 Parenthood Federation of America (PPFA), and the Attorneys General Multistate letter).

12 100. And HHS is well aware of its own limitations and statutory authority. HHS analyzed
13 Section 1554 in its recent rulemaking regarding the contraceptive coverage mandate—yet another
14 regulation impacting a women-specific healthcare issue. *See Religious Exemptions and*
15 *Accommodations for Coverage of Certain Preventive Services Under the Affordable Care Act*, 83
16 *Fed. Reg. 57552* (Nov. 15, 2018) (to be certified as 29 C.F.R. Pt. 2590). HHS has a basic
17 obligation to examine its legal authority to act. *See Sierra Club v. Pruitt*, 293 F.Supp.3d 1050,
18 1061 (N.D. Cal. 2018) (rejecting agency’s waiver argument where agency was presented with
19 sufficient challenges to its behavior and still failed to fulfill its “obligation to examine its own
20 authority”).

21 2. The Rule is Contrary to the Section 1557 of the ACA

22 101. The Rule is similarly in conflict with, and undermines, the anti-discrimination
23 protections provided by the ACA. The ACA is the first federal law to prohibit discrimination,
24 setting forth in Section 1557 a clear prohibition against discrimination in a broad range of health
25 programs and activities, against individuals on the basis of any classification listed under four
26 different federal civil rights statutes, including Title VI of the Civil Rights Act of 1964 (race,
27 color, national origin, and sex), and Title IX of the Education Amendments of 1972 (sex). 42
28

1 U.S.C. § 18116. Section 1557 seeks to advance healthcare outcomes and reduce health disparities
2 by protecting groups vulnerable to discrimination in the healthcare context, including women.

3 102. HHS’s Rule discriminates against women by imposing unnecessary burdens and
4 challenges to obtaining a healthcare service unique to women—abortion. Section 1303 authorizes
5 issuers participating in the ACA’s health insurance exchange to choose whether to offer abortion
6 in qualified health plans. HHS recognizes, as it must, that coverage for abortion is utilized and
7 sought out only by women, as it is “women who may *ultimately access* such services.” 84 Fed.
8 Reg. 71,694 (emphasis added). HHS does not deny the disparate impact the Rule will have on
9 women, since women are more likely the enrollees who “would be most likely to intentionally
10 enroll in a [qualified health plan] with [abortion] coverage.” *Id.* at 71, 695.

11 103. Unilaterally increasing the barriers to access healthcare services by targeting qualified
12 health plans with healthcare benefits accessed only by women is discriminatory. If the Rule is
13 implemented, men who are enrolled in qualified health plans that do not offer abortion and are not
14 subject to separate abortion billing requirements, may continue to access the full range of
15 healthcare services available to them without risk of confusion, delay, and ultimate denial of
16 services because of this Rule’s statutorily unauthorized administrative requirements. In contrast,
17 women will be exposed to increased barriers to access to care, which ultimately will result in
18 greater health risks to some women, who, without full abortion coverage, are subjected
19 involuntarily to the increased health risks of pregnancy (discussed in detail in
20 *Subsection III.F(6)*).

21 **D. The Rule’s Unnecessary Changes Require Extreme Costs**

22 104. While HHS updated the cost estimates in the final Rule, it failed to meaningfully
23 consider the weight of this burden on the States, issuers, and consumers. In doing so, HHS
24 discounted commenters’ serious concerns about the Rule’s costs and impacts. On December 9,
25 2019, the States of California and Oregon met with the Office of Management and Budget to
26 reiterate the significant financial burden the Rule would cause on the states and the issuers that
27
28

1 several states previously raised in comments.⁹ California and Oregon requested that HHS
2 accurately label the Rule “economically significant,” thereby requiring the agency to perform an
3 appropriate cost-benefit analysis and assess the costs and benefits of “reasonably feasible
4 alternatives” to the proposal, because, among other impacts, the Rule clearly has an effect on the
5 economy of far more than \$100 million in any single year. *See* Exec. Order 12866 §3(f); 58 Fed.
6 Reg. 51,735 (Oct. 4, 1993). Still, HHS’s insistence that the Rule only clarifies the statute and
7 does not directly impose *new* requirements is contradicted by the cost-benefit analysis HHS was
8 forced to update “for accuracy” after numerous commenters showed that the agency greatly
9 underestimated its burdens. The updated analysis, reflects that an unreasonable amount of money
10 is required to implement these changes. *See generally* 84 Fed. Reg. 71,698.

11 105. The Rule’s impact reaches multiple states and millions of enrollees. The Rule itself
12 estimates that in 12 state-based exchanges alone, 71 qualified health plan issuers will offer 1,129
13 plans that include abortion coverage and will be subject to the Rule. 84 Fed. Reg. 71,696. To
14 become compliant, issuers will need to take several steps, including but not limited to,
15 restructuring budgets, planning, contracting, building IT-systems, creating billing-related
16 outreach, and providing new call center training.

17 106. HHS estimates that one-time costs to bring all affected issuers (94 total) across the
18 country into compliance and implement the technical changes required would cost \$2.7 million
19 per issuer. Moreover, HHS’s unreasonable push to accomplish this billing change in only six
20 months, during the middle of the plan year, would cost each issuer about \$4.1 million in higher
21 contracting costs for system changes and overtime personnel payments. This would bring the
22 total one-time costs for all 94 issuers to \$385 million. 84 Fed. Reg. 71,697.

23 107. In addition to hefty one-time costs, there are substantial ongoing annual costs. For
24 instance, issuers must absorb economic burdens from hiring additional personnel, enrollee
25 outreach, billing accuracy and reconciliation processes, quality assurance, and recordkeeping. By

26 _____
27 ⁹ *See* Office of Information and Regulatory Affairs, EO 12866 Meetings Dashboard,
28 <https://www.reginfo.gov/public/do/viewEO12866Meeting?viewRule=true&rin=0938-AT53&meetingId=4927&acronym=0938-HHS/CMS>.

1 HHS’s own estimate, this would cost approximate \$1.07 million per issuer. The annual burden
2 for all impacted issuers would reach about \$100.2 million. *Id.* at 71,698.

3 108. To accomplish its Rule, HHS estimates that, on average, annual materials and
4 printing costs for all issuers sending paper bills to the 2.6 million enrollees over three years alone
5 (2020 to 2022), would be approximately \$887,721—not counting the costs associated with
6 electronic transactions and IT changes.¹⁰ *Id.* at 71,699.

7 109. The costs to state exchanges are equally alarming. The Rule estimates that on
8 average, each state exchange, will incur in 2020 one-time costs of \$750,000, and ongoing annual
9 costs of approximately \$200,000 for the six months of implementation in 2020, and \$400,000 in
10 2021—costs HHS anticipates will decrease in following years. *Id.* at 71,705. The total ongoing
11 costs for all 12 state-based exchanges that permit the sale of qualified health plans offering
12 abortion coverage is expected to be \$2.4 million in 2020 alone. *Id.*

13 110. HHS itself acknowledges, that compliance with the Rule could force issuers to (a)
14 drop coverage of abortion altogether, (b) absorb excessive costs themselves in states that require
15 coverage by law or policy, or (c) pass on these costs to consumers in the form of increased
16 premiums. In fact, in the preamble of the Rule, HHS states that, “[s]ubject to applicable state
17 law, it is ultimately at the issuer’s discretion whether to cover...abortion services in their
18 [qualified health plans], and thus to incur any associated burden” imposed by the Rule. 84 Fed.
19 Reg. 71,688. And while HHS recognizes that these changes have the potential to increase out-of-
20 pocket costs for enrollees seeking abortion services or in effect leave enrollees without healthcare
21 coverage, HHS fails to fully account for these costs to consumers, the impact on women
22 specifically, and by extension, the harms to the States’ public health and increased costs to their
23 fiscs.

24 111. Notably, HHS admitted that maintaining the status quo would promote stability for
25 issuers and the evolving exchanges. 84 Fed. Reg. 71,708. However, choosing instead to pursue
26

27 _____
28 ¹⁰ This cost assumes that more consumers will increasingly opt to receive electronic bills
over time, e.g., 90 percent in 2020, 88 percent in 2021, and 86 percent in 2022.

1 its stated purpose to “better align” the Rule with Section 1303, HHS declined to withdraw its
2 proposals.

3 112. HHS instead purports to consider alternatives to the final Rule, though it is clear that
4 they did not meaningfully consider these alternate options. The Rule runs through several options
5 that are as unreasonable as the final Rule.

6 113. First, HHS considered eliminating the requirement that issuers must provide
7 instruction to consumers who fail to make payments separately, but concluded that consumer
8 education is important to achieve better alignment with section 1303. *Id.* at 71,708. However,
9 this option lacks common sense, because while issuers are required to spend additional resources
10 tracking down consumers who mistakenly fail to pay the two bills in separate transactions, policy
11 holders are free to continue paying their premiums in a single transaction.

12 114. Second, the agency admits to having considered further expediting the effective
13 implementation of the Rule, up three months from the date of publication, increasing one-time
14 costs by 100% and driving up total estimated costs for issuers, exchanges, and consumers, up to
15 \$740 million in 2020. *Id.* But considering an alternative that exorbitantly increases the costs and
16 burdens for all parties involved, such that in relation it seemingly makes the initial proposal’s
17 costs seem modest by comparison, is hardly representative a viable option. Particularly given the
18 agencies last and final consideration, which concerned the proposed rule’s excessive costs.

19 115. In this final alternative, HHS claims to have considered following through with the
20 separate mailing requirement (requiring two envelopes) as initially proposed. *Id.* HHS calculates
21 that after updating its deep underestimation of the costs of requiring issuers to send separate
22 envelopes, the costs would have been resulted in an additional \$11 million in 2021 for all issuers.
23 *Id.* However, this alternative only scratches at the surface of the excessive costs that the Rule
24 itself estimates compliance will require. To say HHS “mitigated” the costs by eliminating the
25 two-envelope mailing requirement does little to acknowledge the serious problems with the
26 excessive cost of this unnecessary Rule, particularly when as finalized, the total one-time costs
27 for all 94 issuers reaches \$385 million, and the annual ongoing burdens \$100.2 million. *Id.* at
28 71,697-698.

1 116. However, without any evidentiary support at all, HHS decided that “better alignment”
2 with HHS’s new, and unsupported, interpretation of Section 1303 simply outweighs the Rule’s
3 drastic costs and financial burdens described above.

4 117. The Rule never discusses or considers attainable alternatives that target the primary
5 purpose of the statute. For example, there is no discussion or consideration of the verification
6 requirements or processes currently in effect. Nor is there any discussion of the account
7 segregation plans submitted and reported by issuers to state regulators that certify the back-end
8 reconciliation and verification of the abortion billing process and segregation of funds. Judicious
9 rulemaking would have at a minimum addressed the relevant transactions that already occur after
10 abortion services are obtained, including the maintenance of the plans’ segregated accounts, to
11 provide assurance that issuers pay for abortion services with segregated funds that do not include
12 federal subsidies.

13 **E. The Rule is Illogical and the Final Modifications Cannot Cure its**
14 **Deficiencies**

15 118. The Rule is illogical because it fails to accomplish HHS’s purported goal. The Rule’s
16 changes do nothing to achieve HHS’s stated objective of compelling consumers to pay separate
17 bills. While the Rule requires that issuers send out separate bills (either in one envelope or two
18 electronic transmissions), consumers who are policy holders are seemingly free to ignore the Rule
19 and continue to pay a monthly bill in a single transaction. Specifically, the final Rule requires
20 that issuers must instruct policy holders to pay each bill through separate transactions, but are
21 prohibited from refusing a combined payment, and cannot initiate either a grace period or
22 terminate the policy holder’s coverage on the basis that the policy holder did not send two
23 separate payments as requested by the issuer. § 156.280(e)(2)(ii)(B); 84 Fed. Reg. 71,685.

24 119. As HHS itself acknowledges, it is common and likely for a policy holder to pay one
25 payment, rather than two payments. HHS agrees that requiring two payments could, in spite of
26 expensive and “fulsome outreach and education efforts to explain the billing scheme to the policy
27 holder, consumer confusion could still lead to inadvertent coverage losses.” *Id.* at 71,686.
28

1 120. These problematic features of the Rule not only demonstrate inadequate rulemaking
2 considerations and capricious rulemaking, but its unworkability further provides evidence that
3 Congress did not intend for these burdens to result by instructing how issuers should collect
4 separate—physical or transactional—payments from policy holders. Rather, Congress wanted to
5 ensure that issuers placed payments in segregated accounts and did not use federal subsidies to
6 pay for abortion services.

7 121. Even the final Rule’s modifications underscore the senselessness of the new billing
8 requirements. For example, the final Rule eliminated the excessive mailing costs (estimated by
9 HHS at \$11 million) by allowing issuers to send separate monthly bills in one single envelope to
10 each policy holder, as opposed to the previous proposal of separate bills in two separate
11 envelopes. This change was made despite the position taken in the proposed regulation, that
12 sending two separate bills will reduce consumer confusion because consumers may “inadvertently
13 miss or discard a second paper bill included in a single envelope.” Patient Protection and
14 Affordable Care Act; Exchange Program Integrity, 83 Fed. Reg. 10750, at 56023 (Nov. 9, 2018).
15 However, issuers must still send separate monthly bills when transmitting bills through email or
16 other electronic means.

17 122. The final Rule’s modification—now allowing single envelope mailing—still largely
18 ignores the evidence before HHS. This includes comments submitted by, among others, Blue
19 Shield of California, Covered California, Access Health CT, and the District of Columbia’ Health
20 Benefit Exchange Authority pointing to the excessive administrative costs—beyond its mailing
21 burdens—that are associated with redesigning billing systems, processing invoices and “binder
22 payments” for new enrollments, and additional customer service support required to facilitate
23 these changes. All of these expenses will likely lead to increased premiums for consumers. And
24 despite inserting language notifying policy holders they will receive a separate email with another
25 bill, the separate email might more easily be missed by policy subscribers clearing their inbox
26 believing they have already paid their premium.

27 123. Moreover, the Rule fails to quantify—at all—the disproportionate costs and personal
28 burdens that will befall policy holders, States’ low-income and rural residents who do not have

1 easy access to the internet (raised by comments submitted by the National Women’s Law Center),
2 or do not have active checking accounts, debit and credit cards. In light of these circumstances,
3 other preferences for hard mail communication, and despite encouragement to “opt into email
4 as... [the method of] preferred communication ... 70% of enrollees continue to receive
5 communications via standard mail” in California alone. (Comment submitted by Covered
6 California). HHS itself estimates that approximately 90% of policy holders will receive paper
7 bills in 2020. 84 Fed. Reg. 71,699. HHS claims to “understand that many enrollees face barriers
8 to accessing the internet and have little choice but to receive paper bills,” yet it fails to consider
9 the resulting costs to low-income individuals. *Id.* Specifically, the Rule does not fully account
10 for the increased personal administrative expense to enrollees. *Id.* at 71,706-707 (only addressing
11 the costs to “read and understand the separate bills received.”).

12 124. These problematic features of the Rule demonstrate inadequate rulemaking
13 considerations and resulting in capricious agency action.

14 **F. HHS Failed to Consider Key Problems with the Proposed Rule**

15 125. HHS ignored numerous comments from individuals, states, issuers, and private
16 organizations that warned against complicating the administrative burdens already imposed on the
17 healthcare markets and exchanges and the potential for those burdens to result in harm to the
18 states’ fiscs, consumers, and public health.

19 **1. The Rule Illegally Imposes Administrative Burden on the States’ 20 Regulators by Penalizing Issuers for Offering Abortion Coverage**

21 126. Defendant’s Rule penalizes issuers for doing business in the States. The Rule’s
22 excessive regulatory burdens unfairly and disproportionately target the States that choose to
23 invest in women’s access to comprehensive healthcare, particularly in Plaintiff States that
24 mandate or allow health plans to cover abortion services as part of the essential health benefits.
25 By extension, the Rule seeks to further disincentivize issuers from providing abortion coverage in
26 those states that do not yet have specific laws restricting it, by creating barriers to doing so.

27 127. While the Rule creates onerous requirements for issuers to abide by, these changes
28 contemplate and necessarily demand from the States’ equally burdensome and costly adjustments

1 to the way in which the States' regulate their health insurance markets and administer their health
2 exchanges. To comply and respond to the changes issuers are subject to, the States will have to
3 make unnecessary structural changes that only add administrative costs and divert funds from
4 other critical aspects of the States' insurance market and exchange operations.

5 128. To begin, the Rule will add unnecessary burdens requiring issuers to expend time and
6 money to alter budgets and allocate resources for the technical build of their systems. Issuers will
7 need to account for various changes, including changes to enrollment processes; generating
8 multiple billing statements; automating separate invoices (mail or electronic communication);
9 adding electronic communications and payment links; processing separate payment collections;
10 restructuring response processes and call center training; conducting billing-related outreach and
11 interactive voice response (IVR) technology; updating enrollee notifications related to non-
12 payment and grace periods; updating Health Insurance Casework System (HICS) and Department
13 of Insurance (DOI) complaint processes; restructuring grievance/appeals processes; and conduct
14 testing to ensure billing accuracy. This long list of added burdens will likely cause issuers to
15 spend more in resources to deal with the resulting consumer confusion from multiple bills, missed
16 payments, system errors, and delinquent notices. But these changes are not appropriate,
17 economically sound, or necessary.

18 129. Therefore, if implemented, the Rule will place participating issuers in the difficult
19 position of having to comply with state laws that require or allow abortion coverage by absorbing
20 significant costs and passing these costs on to consumers in the form of increased premiums,
21 dropping abortion coverage in states without an abortion coverage mandate, or leaving the
22 insurance market altogether. Any increase in premiums risks denying consumers—who cannot
23 afford the premium increase—critical health coverage. And the same could result if issuers
24 choose to drop coverage or leave the state due to the cost of offering abortion coverage under this
25 Rule.

26 130. In addition, responding to these changes required by the Rule also places the States'
27 in a bind. For example, to be able to bill separately, some issuers like Blue Shield in California,
28 will need to issue two separate insurance policies per enrollee, one exclusively for coverage of

1 abortion services, and another for coverage of the remaining health benefits. Covered California,
2 the state's exchange, cannot accommodate this need for separate transactions, because state law
3 mandates that all insurance policies they produce include abortion coverage in a *single policy*.
4 *See* Cal. Health & Safety Code §1340 *et seq.* To comply then, the Rule will force Blue Shield to
5 absorb the costs of the structural changes discussed above, and will incur additional costs for its
6 weekly and monthly reconciliation of separate insurance billings with Covered California's single
7 policies. The Rule would impose these unreasonable requirements despite the fact that all issuers
8 already comply with section 1303's segregation requirements.

9 131. Moreover, under the Rule, the separate billing and separate payment requirements
10 will also increase the administrative costs of the States' insurance regulators.

11 132. In California, Department of Managed Health Care (DMHC) and the California
12 Department of Insurance (CDI), are two of the state agencies that regulate health insurance plans.
13 DMHC primarily regulates health maintenance organizations (HMOs), while CDI has jurisdiction
14 over traditional health insurance. In California, issuers already submit to these respective
15 agencies annual filings regarding their premium segregation plans, complete with separate
16 financial accounting systems, monthly reconciliation processes, and internal controls to ensure
17 that they are in accordance with federal regulations.¹¹ Every carrier does this differently, and
18 Covered California would have to work independently with the State's 11 insurance carriers to
19 determine a synchronized approach that is appropriate for both agencies.

20 133. First, the California Department of Managed Health Care, which oversees a majority
21 of the qualified health plans impacted, estimates that compliance with the new Rule will
22 unnecessarily increase the state agency's administrative burden of over one million dollars. This
23 includes: (1) \$200,000 related to the increase in call volumes to deal with consumer complaints
24 and confusion over premium bills; (2) \$150,000 for additional "segregation of funds plans" legal
25 reviews submitted by issuers; (3) \$400,000 for enacting new regulatory packages clarifying

26 ¹¹ 45 C.F.R. 156.280(e)(5)(ii). California Dep't of Managed Health Care "segregation
27 plan" filings: Kaiser, Anthem, Blue Shield, Molina, Oscar, Chinese Community Health Plan,
28 HealthNet, L.A. Care, Santa Clara County, Sharp, and Western Health Advantage (documenting
current compliance with segregation accounts).

1 safeguards and cancellation dollar thresholds for issuers; and (4) \$300,000 for additional analysis
2 required to be conducted by its Office of Plan Licensing related to issuer filings and disclosures
3 for compliance with the Rule. All of these costs are unnecessary, as all the plans currently
4 comply the California's segregation policies involving abortion coverage in qualified health
5 plans.

6 134. A second impacted California regulator is the California Department of Insurance,
7 which is the largest consumer protection agency in the state. The department estimates the
8 implementation of the Rule will bring about significant administrative burdens totaling about
9 \$156,390 initial costs for plan year 2020, and ongoing costs of \$247,620. These costs include:
10 (1) \$151,900 for the 2020 plan year and \$141,120 in ongoing costs due to increases in call
11 volumes to their consumer services call center (and additional full-time personnel); (2) \$2,130 for
12 consumer services training; (3) \$1,233 for consumer education materials; (4) \$1,127 for
13 additional legal review of the Rule's policy changes; (5) and \$106,500 in annual costs of
14 additional hearings regarding wrongful termination of coverage that will require legal evaluation
15 and handling.

16 135. Similarly, New York State Department of Financial Services ("NYS DFS"), will face
17 a range of administrative burdens, including having to field a significant increase in calls and
18 other inquiries from consumers regarding the receipt of multiple bills and the requirement for
19 separate payments for health plan premiums. In addition, NYS DFS expects to receive calls and
20 inquiries about the potential loss of coverage for medical services. Consequently, NYS DFS will
21 need to direct resources to respond to the increased number of consumer calls and inquiries
22 related to this Rule, including but not limited to development of Q&A's for NYS DFS staff, and
23 consumer education materials for distribution on the NYS DFS' website and potentially other
24 outlets.

25 136. In addition, NYS DFS, as New York's primary regulator of health insurance plans,
26 will need to respond to insurers' inquiries about the Rule's effects and will be required to provide
27 regulatory guidance on the Rule. NYS DFS will need to devote resources to developing and
28 implementing circular letters and other forms of guidance for the health plan industry in New

1 York State. Multiple stakeholder groups would be required to be convened, and staff would have
2 to be directed to oversee these groups – plans, consumers, and providers. NYS DFS would
3 ultimately have to expend additional resources to draft and review, and finally publish a circular
4 letter.

5 137. In Colorado, the Division of Insurance (“CO DOI”) supervises the insurance industry
6 by responding to consumers’ questions, investigating their complaints, and helping them to
7 understand their insurance and by regulating and monitoring insurance companies in Colorado for
8 compliance. CO DOI also anticipates an array of administrative burdens as a result of the Rule.

9 138. First, CO DOI expects the Rule to impact its consumer-facing responsibilities by
10 requiring additional resources to ensure adequate consumer education through consumer outreach
11 materials or website notices. CO DOI also anticipates it will receive increased calls and inquiries
12 from consumers regarding the potential loss of coverage and separate billing confusion, and an
13 increase in complaints to CO DOI’s Consumer Services division. Second, CO DOI anticipates
14 devoting additional resources to providing notice and guidance to the industry as to how to
15 comply with the Rule and ensuring compliance through additional review of issuers’ filings and
16 billing processes.

17 139. In the District of Columbia, the Department of Insurance, Securities and Banking
18 (DISB) protects the interests of District consumers by ensuring that insurers and individuals
19 presenting insurance products in the District are qualified, appropriately licensed, and meet and
20 act in accordance with all requirements of the insurance laws. DISB estimates the
21 implementation of the Rule will bring about significant administrative burdens and costs, which
22 include: (1) an increase in call volume and AskTheCommissioner email requests about the Rule;
23 (2) an increase in formal complaints to DISB’s Consumer Services Division; (3) an increase in
24 operational costs associated with training the Consumer Services Division and Forms Examiners;
25 and (4) an increase in costs for drafting and distributing consumer education materials.

26 140. Maine operates a Federally-facilitated Marketplace (FFM) and conducts plan
27 management activities to support certification of qualified health plans by CMS. Administration
28

1 of Maine's individual marketplace,¹² including premium billing and collection functions, is
2 handled at the federal level through the FFM and not by the State. Maine law, however, requires
3 carriers seeking to cancel an individual health insurance policy for nonpayment of premium to
4 provide notice prior to cancellation. Me. Rev. Stat. tit. 24-A, §2707-A; 02-031 C.M.R., Ch. 580.
5 Insurers further must provide a grace period (of 7, 10, or 31 days) for the payment of premium,
6 during which grace period the policy shall continue in force. *Id.* § 2707. Consumers whose
7 health insurance coverage has been cancelled without being provided the required notice or grace
8 period upon a failure to pay the separate premium contemplated by the Rule may request a
9 hearing before the Maine Superintendent of Insurance. Me. Rev. Stat. tit. 24-A, § 229. The
10 Rule's unique separate billing and payment requirements, nowhere comparable in any other line
11 of insurance, are likely to result in consumer confusion and result in more cancellations of
12 policies for nonpayment of premiums. This will result in additional administrative burden and
13 expense for Maine resulting from the regulation, oversight, and enforcement of insurer billing
14 practices for compliance with the Rule. In addition to the potential for increased requests for
15 agency administrative hearings, the Bureau of Insurance Consumer Health Care Division
16 (CHCD) inevitably will receive more consumer inquiries. CHCD staff, under the direction of the
17 Superintendent of Insurance, will need to consider allocating resources to develop and implement
18 consumer outreach efforts about the separate billing and payment requirements of the Rule.

19 141. In Maine, there are only three issuers participating in the individual marketplace:
20 Anthem Healthplans of Maine, Maine Community Health Options, and Harvard Pilgrim Health
21 Care. The separate billing and payment requirements of the Rule will require these issuers to
22 make structural changes to their billing and payment reconciliation processes, accounting
23 systems, and internal controls resulting in costs that they will be forced to absorb mid-term
24 beginning June, 2020 (insurer rates are locked-in for the one-year policy period). Thereafter, in
25 subsequent policy periods, these issuers must decide whether to continue absorbing these costs or
26 to pass them on to consumers through increased premiums. Alternatively, one or more of the

27 _____
28 ¹² Discussion of Maine's marketplace refers specifically to the state's ACA individual
marketplace for purposes of this complaint.

1 three issuers could make the unfortunate decision simply to leave the state due to the uncertainty
2 of the system impacts and increased costs of offering abortion coverage in compliance with the
3 Rule.

4 142. In Maine, this concern is not theoretical. For example, due to the uncertainty of
5 sufficient premium rate recovery for cost sharing reductions (CSRs) under the ACA, for plan year
6 2018 Anthem Maine withdrew from the Maine ACA market. Anthem Maine's absence was
7 temporary, and it returned to the Maine ACA market for plan years 2019 and 2020. The
8 prolonged departure from the market of one or more of the three remaining issuers currently
9 offering ACA coverage in the state is a troubling prospect. Any destabilization of the individual
10 market resulting from the departure of one or more issuers could harm Maine consumers through
11 higher premiums that often result from decreased competition.

12 143. The Maryland Insurance Administration, which oversees all of the qualified health
13 plans impacted by the Rules, will similarly experience an increase in administrative burden and
14 incur costs to ensure compliance with the new Rule and to handle an increase in consumer
15 complaint volume. All carriers in Maryland already submit to the Maryland Insurance
16 Administration annual filings with respect to the premium segregation plans, complete with a
17 reconciliation of all segregated account activity, and an annual attestation of compliance,
18 including accounting documentation and internal controls, of the segregated account. MIA
19 Bulletin 13-24, Segregation of Funds for Certain Abortion Services Covered under Qualified
20 Health Plans Sold on the Individual Exchange (July 31, 2013), <https://tinyurl.com/vqvrkof>. The
21 Maryland Insurance Administration will have to update the regulatory guidance provided to
22 impacted carriers and update the legal reviews of the annual compliance filings.

23 144. Like other State regulators, the Maryland Insurance Administration will experience
24 an increase in costs due to an increase in call volume to their call center, complaints regarding
25 coverage terminations, and appeals hearings contesting plan terminations. The Maryland
26 Insurance Administration will also incur costs to engage in consumer education about the Rule
27 change.
28

1 145. Oregon’s insurance regulator, the Division of Financial Regulation, similarly
2 anticipates the Rule change will result in additional administrative burdens, such as increased
3 calls to its consumer advocacy unit.

4 146. In Vermont, billing issues are a primary source of qualified health plan customer
5 complaints. In addition, if a customer underpays a premium payment, their plan will be cancelled
6 after a one- to three-month grace period, unless the customer makes up the underpayment. A
7 customer who has been disenrolled for nonpayment generally may not re-enroll in an insurance
8 plan until the annual open enrollment period, absent certain limited exceptions. The confusion
9 created by the Rule will cause customers to needlessly lose health insurance coverage, resulting in
10 consumers facing high out-of-pocket costs for care and foregoing necessary medical treatment,
11 including but not limited to abortion care and contraception coverage. Vermont will receive
12 consumer questions and complaints as a result of the confusion generated by the new rule, and
13 expects increased administrative burdens in responding to these complaints.

14 147. The administrative difficulties imposed on health plans, exchanges, and regulators
15 demonstrate the Rule’s true aim—to make it impossible for carriers to provide women full and
16 comprehensive healthcare coverage by penalizing issuers individually, and unnecessarily
17 disrupting the state agencies regulatory schemes.

18 148. HHS admits that this Rule will significantly increase the administrative burdens for
19 qualified health plans providing abortion coverage. 84 Fed. Reg. 71,696-97. HHS identified the
20 types of burdens imposed on insurance carriers, now required to invest time and resources to
21 oversee the process of sending separate bills, review the accuracy of receipt of separate payments,
22 process additional payments, and add functionalities to operating systems to develop new and
23 separate automated payments. 83 Fed. Reg. at 56028. And if carriers want to provide abortion
24 coverage, the Rule will force companies to pay, on average, \$1.07 million dollars annually to
25 provide comprehensive healthcare to women. *See* 84 Fed. Reg. 71,698.

26 149. Once again, HHS acknowledged these costs and ignored them, setting an effective
27 date within six months after the Rule’s publication and in the middle of a plan year, with no
28 possibility of accounting for any potential changes in costs.

1 150. HHS also failed to adequately consider the impact of the significant increase in
2 administrative costs that issuers must bear in 2020, amounts it cannot recoup in 2020 premiums,
3 on its Medical Loss Ratio calculation. Medical loss ratio involves the share of premiums that
4 issuers pay on claims, with the remainder going to administrative expenses, other costs, and
5 profits. The ACA set the medical loss ratio as a mechanism to protect consumers from dramatic
6 premium increases; currently the medical loss ratio threshold for the individual market is set at
7 80%; meaning that 80% of premium charges must be used for direct coverage of medical service
8 costs or quality improvement expenses. *See generally* 42 U.S.C. § 300gg-18 (LexisNexis 2019).
9 If issuers use less than 80% of premium charges for medical claims or quality improvement
10 expenses (with some exceptions), issuers are required to issue rebates to consumers.
11 Consequently, an issuer’s rise in administrative costs is an important factor in establishing
12 premium amounts to assess whether they will be responsible for high consumer rebates.

13 151. HHS suggests in the preamble that issuers would be able to use funds from the
14 allocation account attributable to abortion premiums to cover any administrative burdens resulting
15 from not being able to update individual market rates prior to the 2021 plan year, in order to
16 mitigate the excessive financial consequences of the Rule discussed above. *See id.* at 71,690.
17 HHS plainly ignores that these funds are to be “used exclusively to pay for [abortion] services”
18 not an issuer’s administrative costs of providing that service. 42 U.S.C. 18023(b)(2)(C)(ii)(II)
19 (emphasis added). HHS not only ignores the statutory limitations assigned to the allocation
20 account attributable to abortion premiums, but simply states that it does not anticipate that the
21 rule will “measurably increase” medical loss ratio rebates because it believes issuers have a
22 simple option: “issuers would either cease offering [abortion] coverage,” unless required by state
23 law, in the plan year 2020 to avoid issuing additional medical loss ratio rebates, “or would pay for
24 the increased administrative costs from a different revenue source,” mainly the segregated
25 account. 84 Fed. Reg. 71,704.

26 152. Simply put, the Rule has been designed to penalize and discriminate against issuers
27 participating in states requiring coverage of abortion services, and to coerce issuers in states
28

1 where it is not mandated to drop such coverage altogether; there is no other plausible explanation.
2 This in itself is capricious agency action.

3 **2. The Rule Disrupts the Robust Administration of the States’**
4 **Exchanges, Imposing Unnecessary Cost to Its Enrollment System**

5 153. The Rule’s unnecessary change in abortion coverage billing will disrupt the States’
6 administration of exchanges and cost millions of dollars to come into compliance within six
7 months. Compliance could require unnecessary restructuring of the exchanges, particularly those
8 which conduct their own premium billing and collection functions, and has the potential to disrupt
9 current and future marketing and enrollment campaigns, requiring significant allocation of
10 resources to consumer outreach efforts for all exchanges.

11 154. Covered California, California’s state-based exchange, has created a robust health
12 insurance system that provides for a competitive marketplace, and has maintained strong
13 relationships with insurance carriers while empowering consumers to choose the plans that give
14 them the best value. Its extensive investments in outreach allowed the exchange to raise
15 consumer awareness of the value of health insurance coverage and the availability of federal
16 financial assistance, through exchange subsidies. These efforts have led to healthy enrollment
17 and retention rates across the California. In fact, California’s uninsured rate dropped
18 considerably, from 17% in 2013 to 6.8% in 2017. Today, over 1.5 million enrollees receive
19 health insurance coverage purchase through the state’s individual market exchange.

20 155. As discussed in *Section III.D* above, the costs of implementing the new Rule on the
21 States’ exchanges are unnecessary and ongoing. Covered California anticipates that the Rule has
22 the potential to increase consumer calls to Service Centers, leading to longer wait times. Covered
23 California will have to develop talking points for Service Center and contracted enrollers, such as
24 agents, amounting to 40 hours of personnel time and costing \$1,225. In addition, the exchange
25 will have to change materials educating the public on the Rule’s policy changes, potentially
26 requiring the diversion of consumer outreach and marketing funds. Moreover, Covered
27 California will need to evaluate operational changes to mitigate the Rule’s adverse impacts, such
28

1 as amending the contracts with the state's health plans to prohibit them from terminating policy
2 holders for failing to pay the separate \$1 premium.

3 156. Additionally, the exchange would need to assess how best to disseminate education
4 and information over any required changes to binder payments made to issuers, the initial
5 payments made after enrollment that control whether or not a new enrollee's policy is initiated
6 (discussed below). Because California law prohibits Covered California from issuing two policy
7 transactions (all health benefits must be included in a single policy), it is likely that the exchange
8 will be forced to pass on these costs to issuers participating in the Covered California exchange.

9 157. The cost of implementing this Rule could risk Covered California's important annual
10 enrollment gains. Covered California has fixed sums for marketing but would now need to
11 redirect funds to consumer outreach and education to explain the policy changes and mitigate
12 against consumer confusion and termination of coverage. Covered California has adopted a
13 marketing, outreach, and sales budget for 2019-2020 that allocates \$121 million, an increase of
14 \$13.6 million from the 2018-2019 budget, and accounts for almost a third of its total operating
15 budget of \$379 million.

16 158. Marketing matters because outreach drives enrollment on and off the exchange.
17 Specifically, the marketing, outreach and sales budget of 2019-2020 includes \$6.5 million for a
18 navigator program and \$55 million for paid media ads, which aid in informing Californians about
19 the value of insurance and the availability of financial assistance for many, encouraging retention
20 of those already enrolled, and maintaining a favorable mix of enrollees for the health insurance
21 risk pool. Covered California's navigator program is especially important, as it is a partnership
22 with community organizations across the state that has experience in reaching and assisting
23 California's diverse populations and has proven successful in enrolling more consumers annually.
24 Of that \$55 million, \$10 million has been added to the originally proposed budget for the
25 development and implementation of new creative media that will target audiences and advance
26 the effort in educating consumers about the new state subsidy and California's individual
27 mandate. These funds are critically important and necessary, as these aggressive efforts have
28 demonstrably improved the State's coverage rates.

1 159. Attaining compliance with HHS’s new Rule by June 27, 2020 places significant
2 additional costs on the State. For example, in January 2019, only 26% (377,700) of Covered
3 California’s consumers selected email as their preferred method of communication, 49%
4 (705,000) selected mail, and about 20% have unspecified responses, which defaulted to mail as
5 the preferred method of communication. Due to the limited number of exchange enrollees
6 subscribed to email, together with barriers many subscribers still face in accessing the internet,
7 outreach could be costlier through more aggressive mass mailing and on-the-ground marketing
8 campaigns during the mid-plan year. This Rule would cost Covered California unnecessary
9 resources to implement, in addition to the reallocation of marketing funds that currently provide
10 critical consumer outreach that drives its success.

11 160. New York State of Health (NYSoH), established within the New York State
12 Department of Health, is New York State’s health exchange. Like other state exchanges, NYSoH
13 forecasts a significant increase in consumer calls to its call center as a consequence of the Rule’s
14 requirement of separate billing and payments. Such an increase in call volume will place
15 administrative burdens on the call center and will increase contract costs by an estimated
16 \$600,000. NYSoH will likely be required to develop materials for call center staff to delineate
17 how to advise consumers, and train staff to be prepared for the calls. In addition, overly
18 burdensome administrative requirements will drive up issuer costs, which could then be passed
19 onto consumers in the form of higher premiums.

20 161. Connect for Health Colorado operates Colorado’s state-based exchange. Connect for
21 Health Colorado anticipates the Rule will cost at least an estimated \$30,000 to respond to
22 consumer issues, including confusion about the separate billing and payment requirements, and to
23 proactively engage in consumer education and outreach regarding payment of premiums and
24 impact to coverage. Connect for Health Colorado also expects it will need to expend additional
25 resources to train staff to address issues involving the separate payments and to train brokers and
26 navigators regarding the changes. Connect for Health Colorado also may need to devote
27 additional resources to systematic changes to assist issuers in compliance with the Rule.
28

1 162. The District of Columbia Health Benefit Exchange Authority (DC Exchange)
2 operates the District's state-based exchange. The DC Exchange estimates that it will incur
3 approximately \$3.93 million annually in FY20 and FY21 in costs directly related to the Rule. Of
4 this amount, \$1.45 million is required to staff increased consumer calls to its contact center,
5 inquiring about the separate billing and separate payment requirements, its ramifications, and how
6 to properly make payment. Increased staff will also be required to address increased churn and
7 non-pay terminations resulting from consumer and carrier confusion regarding payment and
8 application of dual payment for single policies as described in paragraph 185. The costs
9 associated with the increased staffing and training required of call center workers and internal
10 staff by the DC Exchange's legal and policy staff to understand the Rule, its interactions with
11 District law, and any new DC Exchange policies will be approximately \$265,499 per year.
12 Additionally, the marketing department must engage in a comprehensive campaign to educate
13 consumers on the existence of the Rule, their rights, and how to avoid losing coverage. This
14 marketing campaign is expected to cost \$1.15 million annually in FY20 and FY21 in staff and
15 media costs. This campaign is particularly crucial because of the District's requirement for
16 individuals to maintain health coverage; the District needs consumers to know that the separate
17 billing and separate payment requirements may cause them to lack coverage and thus not comply
18 with the District's coverage requirement and may subject them to tax penalties.

19 163. The anticipated increase in wrongful terminations based on carrier errors or
20 misinformation will cost the DC Exchange an estimated \$391,449 annually in FY20 and FY21 to
21 process special enrollment period requests, reinstatements, and associated administrative appeals
22 related to these requests. The DC Exchange will also experience an estimated \$243,937 annually
23 in FY20 and FY21 in additional expenses for enrollment transactions caused by the unnecessary
24 disenrollment and re-enrollment churning caused by the Rule.

25 164. In order to comply with the Rule by June 27, 2020, the DC Exchange will need to
26 engage in off-cycle review of carrier notices and plan documentation, which normally only occurs
27 at annual plan re-certification. The separate billing and payment requirements are new
28 requirements that must be reviewed annually, making it an ongoing expense for the DC

1 Exchange's plan management team. These burdens will increase costs for the DC Exchange by
2 an estimated \$78,412 annually in FY20 and FY21. Beyond the new federal requirements on
3 issuer certification, the DC Exchange is likely to develop new policies, either on its own or in
4 conjunction with the District of Columbia Council and District of Columbia Department of
5 Insurance, Securities, and Banking, in an attempt to mitigate the negative effects of the Rule. The
6 DC Exchange's executive, legal, and policy staff time associated with this work is expected to
7 cost approximately \$185,541 annually in FY20 and FY21.

8 165. The Maryland Health Benefit Exchange, Maryland's state-based exchange has,
9 through innovation and accomplishment, created a robust marketplace that offers Marylanders
10 affordable and comprehensive health insurance options. As a result of a State reinsurance
11 program, individual market premiums decreased by an average of 13% in 2019 and another 10%
12 for 2020. MHBE's extensive investments in technology through its website, mobile application
13 and call center, and in outreach and marketing to consumers have led to healthy enrollment and
14 retention rates in Maryland, increasing the State insured rate to 94% in 2019.¹³

15 166. The Maryland Health Benefit Exchange anticipates that it will incur significant cost
16 increases as a result of the Rule, including at a minimum, one-time costs of \$16,000 to staff a
17 special stakeholder workgroup to determine how best to educate consumers, consumer assistance
18 workers and others about the Rule's premium billing and payment changes. The costs of
19 effectuating the educational plan have yet to be determined. MHBE anticipates it will incur
20 \$240,000 in annual costs to handle the increase in call volume to its customer service call center
21 regarding the billing and payment changes and foreseeable plan terminations. MHBE is currently
22 assessing the costs it will incur to handle the increased complaint volume to its Appeals and
23 Constituent Services department by consumers who have questions or concerns about the billing
24 and payment changes, or whose plans are terminated for premium nonpayment - and the increase
25 in hearings contesting the terminations.

26
27 ¹³ [https://www.marylandhbe.com/wp-](https://www.marylandhbe.com/wp-content/uploads/2019/MHC_Annual_Report%202019.pdf)
28 [content/uploads/2019/MHC_Annual_Report%202019.pdf](https://www.marylandhbe.com/wp-content/uploads/2019/MHC_Annual_Report%202019.pdf)

1 167. MHBE's marketing and outreach efforts will be impacted by the Rule. Marketing
2 and outreach drives enrollment on and off the exchange. MHBE has fixed sums for marketing but
3 will need to redirect funds to explain the Rule's policy changes and to mitigate against consumer
4 confusion and termination of coverage. MHBE's marketing and outreach budget for fiscal year
5 2020 includes \$ 3.2 million for full service communications and marketing used to inform
6 Marylanders about the value of insurance and the availability of financial assistance for most
7 Marylanders, encouraging retention of those already enrolled, and to maintain a favorable risk
8 pool. These funds are critically important and necessary for a stable marketplace. As the budget
9 cycle for Maryland runs July 1st through June 30th, most of the FY2020 funds have already been
10 expended on open enrollment and there are little funds left for any new, unplanned initiative.
11 MHBE is assessing how much of the remaining budget will need to be diverted to create and
12 execute a marketing plan to educate consumers about how health insurance premiums, unlike any
13 other insurance premiums, will now be billed and collected. Attaining compliance with HHS's
14 new Rule by June 27, 2020 significantly increases the costs. For example, as of January 2020,
15 41% of MHBE's consumers selected paper mail as their preferred method of communication. As
16 a result, the marketing and outreach that is necessitated by the Rule change will have to be
17 conducted through aggressive mass mailings and on-the-ground campaigns during the middle of
18 the plan year.

19 168. This Rule is likely to risk MHBE's important annual enrollment gains and put at risk
20 market stabilization efforts made the State. The stability of Maryland's marketplace is also tied
21 to other factors, including renewals and the State's reinsurance program. Renewing enrollees
22 made up 74% of the individual qualified health plan enrollments on the Exchange for 2019 and
23 76% for 2020. New enrollments become harder to acquire each year as the State continues to
24 trim its uninsured rate and the remaining uninsured population increasingly consists of the hardest
25 to reach. Renewals are at risk by the Rule's separate billing, separate payment requirement
26 because MHBE will have to reacquire members who are terminated for nonpayment of
27 premiums. This will significantly increase administrative costs.
28

1 169. In 2018, Maryland established the State Reinsurance Program, under a State
2 Innovation Waiver, to increase premium affordability and foster stability in the individual market.
3 Because of the waiver, Maryland has experienced two successive years of double-digit premium
4 decreases, resulting in 2020 premiums that are 23% lower than 2018 premiums. MHBE will need
5 to assess and quantify the additional costs that will be incurred to apply a new actuarial analysis
6 to the State Reinsurance Program based on a projected loss of enrollment due to foreseeable plan
7 terminations. Because the number of enrollees determines federal pass-through dollars allocated
8 under the reinsurance program, insurance premiums, and the amount of state funding needed for
9 the State Reinsurance program, any reduction in enrollment destabilizes Maryland's reinsurance
10 funding and the marketplace as a whole.

11 170. The Oregon Health Insurance Marketplace is State-Based Exchange on the Federal
12 Platform; the state-based health insurance marketplace is operated by the Oregon Department of
13 Consumer and Business Services (DCBS), but utilizes the federal enrollment platform,
14 Healthcare.gov. The Oregon exchange estimates it will need one additional full time employee to
15 handle the increased call volume resulting from consumer confusion and concern over missed
16 payments. This cost would be in the range of approximately \$36,000 - \$52,000 per year.
17 Production and updating marketplace consumer education materials would cost approximately
18 \$1300, and the cost of distributing those consumer education materials would cost approximately
19 \$23,000 per mailing.

20 171. The Department of Vermont Health Access has performed billing functions in the
21 qualified health plan market along with issuers, but it is in the process of transitioning these
22 functions completely to the issuers for plan year 2021. It would be operationally and financially
23 impossible for the Department of Vermont Health Access to make major changes to its billing
24 procedures at this stage.

25 172. Moreover, the ACA grants states the option of performing premium collection
26 services for the individual insurance market's sale of qualified health plans. In states that perform
27 all premium billing and collection functions for individual market consumers, the costs of
28

1 implementing the Rule’s changes will be even more significant, and similar to the costs borne by
2 issuers in other exchanges.

3 173. While HHS reconsidered the “greatly underestimated” cost analysis in the proposed
4 regulation, and determined that the total costs to implement the Rule would reach almost \$550
5 million in 2020 alone, the final Rule remained largely unchanged. 84 Fed. Reg. 71,699. In
6 effect, HHS dismissed a key aspect of the problem relating to the Rule—the excessive costs—and
7 ultimately ignored the many commenters’ concerns and *the agency’s own accounting* of the
8 unconscionably high costs of implementation.

9 174. Instead, HHS reminds “states concerned about enforcement and oversight of these
10 requirements that, under section 1321(c), states may elect not to establish and operate an
11 Exchange, thereby deferring those responsibilities to HHS.” 84 Fed. Reg. 71,694. In fact, in the
12 preamble, HHS assures state-based exchanges, “the Secretary may step in to enforce the
13 requirement against the non-compliant issuer.” 84 Fed. Reg. 71,692.

14 **3. The Rule Puts at Risk the State’s New Coverage Gains**

15 175. As discussed above, the many problems with the Rule put at risk the healthcare
16 coverage of millions of individuals already enrolled in qualified health plans, and place
17 individuals newly enrolled in a delicate position.

18 176. First, commenters explained to HHS that insurance bills, as is the case for “auto,
19 homeowners, and liability insurance policies,” have inculcated in consumers that only one bill is
20 required for the entire premium for any set time period, and the Rule is therefore contrary to well-
21 established industry practice. (Comments submitted by the District of Columbia’s Health Benefit
22 Exchange). This is a key aspect of the insurance industry, where additional invoices are
23 generated “only if there is a late payment or a change to the policy, like adding dependents or new
24 employees.” *Id.* But HHS failed to even discuss the radical departure from entire industry
25 practice. 84 Fed. Reg. 71,684.

26 177. Second, Covered California, among other exchanges, submitted comments to HHS
27 warning that the Rule would leave consumers confused by the need to pay an additional bill of a
28 nominal amount (\$1), and therefore run the risk of losing out on critical health insurance coverage

1 due to inadvertently failing to pay the initial premium payment in full. Specifically, new policy
2 subscribers who have yet to make their initial “binder” payments would effectively lose their
3 coverage before it even begins. This is different from risks of coverage termination.

4 178. As explained by Access Health CT to HHS, “[w]ithout a binder payment, an
5 enrollment is often not effectuated by a carrier” and exchanges work aggressively “through
6 several channels to ensure consumers understand their responsibility for making the first month’s
7 payment, and monthly payments throughout the year thereafter.” (Comments submitted by
8 Access Health CT). Similarly discussed in the Attorneys General comment letter, submitted on
9 January 8, 2019, the Rule’s separate billing requirements put a significant number of enrollees at
10 risk of termination—or in other words, policy non-initiation. But the Rule fails to consider that
11 additional costs of updating internal operations, such as binder payment processing, will require
12 exchanges to redirect vital funds from other programs to additional consumer outreach and
13 marketing. (Comments submitted by Covered California).

14 179. In California, this has the potential to leave large numbers of new enrollees without
15 coverage and risks hurting California’s success in bring down uninsured rate from the historic
16 high discussed above (from 17% in 2013 to 6.8% in 2017). In addition, in 2018, California
17 experienced a 3% growth in enrollment numbers, gaining 423,484 enrollees who signed up for
18 coverage through Covered California for the first time.¹⁴ By 2019, Covered California reported
19 more than 1.5 million enrollees had gained coverage on the exchange’s individual market. In
20 addition, in 2020, more than 318,000 consumers have newly signed up for health insurance
21 through Covered California during the current open-enrollment period (which continues through
22 January 31), and that surpassed last year’s total of 295,000 enrollees. This is in part because new
23 state law requires Californians to have health insurance in 2020 or face a penalty when they file
24 their taxes with the Franchise Tax Board in 2021. Under the Rule, all new enrollees would be at
25 risk of policy non-initiation if they failed to make both billing payments on time. Added to this

26 _____
27 ¹⁴ News Release, Covered California (Feb. 7, 2018),
28 <https://www.coveredca.com/newsroom/news-releases/2018/02/07/Covered-California-Finishes-Fifth-Open-Enrollment-Strong-New-Sign-ups-of-423-484-up-3-Percent-Over-Last-Year/>.

1 are the difficulties and confusion of having to re-navigate the process for coverage re-instatement,
2 seek additional coverage, or procure enough time and resources to secure alternative medical
3 services in the face of an emergency.

4 180. In New York, since opening in 2013, NYSoH has transformed New York's individual
5 insurance market, offering New Yorkers access to affordable health insurance options. NYSoH
6 assists New Yorkers in determining whether financial assistance through federal subsidies is
7 available. Through offering affordable health options on its exchange, New York experienced an
8 unprecedented increase in individual health insurance enrollment. In just seven years — from the
9 opening of NYSoH in 2013 to present — the rate of uninsured New Yorkers has declined from
10 10% to 4.7%. There are currently 12 plans participating on NYSoH.

11 181. NYSoH enrolled 253,102 individuals in a QHP (59 percent received financial
12 assistance to lower the cost of their coverage) in January of 2018.¹⁵ A year later in January of
13 2019, the number of individuals enrolled in a QHP rose to 271,873, with more than half (58%) of
14 those people receiving financial assistance to lower the cost of their coverage.¹⁶ As of January
15 27, 2020, there were 260,513 people enrolled in a QHP (the deadline to enroll in a QHP does not
16 close until February 7, 2020), with approximately 60 percent receiving financial assistance.

17 182. Colorado has made significant gains in enrollment in qualified health plans through
18 its exchange. Connect for Health Colorado has created and fostered a robust and innovative
19 individual market for qualified health plans in Colorado. In 2018, Connect for Health Colorado
20 enrolled over 165,000 individuals in qualified health plans; in 2019, that number grew to 170,741
21 Coloradans, 76 percent of whom receive financial assistance to reduce monthly premiums. There
22 are currently 124 individual plans offered on Colorado's exchange by eight different issuers.

23 183. Moreover, in May of 2019, Colorado established a two-year reinsurance program for
24 2020 and 2021, through a State Innovation Waiver. In July of 2019, CMS approved Colorado's

25
26 ¹⁵ <https://info.nystateofhealth.ny.gov/2018openenrollmentreport> - NYSOH 2018 Open
Enrollment Report

27 ¹⁶ <https://info.nystateofhealth.ny.gov/2019openenrollmentreport> - NYSOH 2019 Open
28 Enrollment Report.

1 application for the State Innovation Waiver to run its state-based reinsurance program. Colorado's
2 reinsurance program is operated by CO DOI and will result in more consumers having coverage
3 and lower premiums, utilizing pass-through funding from the federal government to help offset a
4 substantial portion of Colorado's costs for the reinsurance program. Colorado's reinsurance
5 program is expected to reduce premiums by 16 percent in its first year of operation and result in a
6 2.9 percent increase in enrollment in Colorado's individual market. Because the number of
7 enrollees in Colorado's reinsurance program determines the amount of federal funding received
8 for the program, insurance premiums, and the amount of other funding needed to supplement the
9 program, any reduction in enrollment in the individual market as a result of the Rule's separate
10 billing and payment requirements could adversely impact Colorado's reinsurance program, and
11 the state generally.

12 184. The Rule is likely to cause confusion, loss of coverage, and cancellation of policies.
13 All of these effects undermine the significant gains Colorado has achieved in individual
14 enrollment in qualified health plans through its effective operation of its exchange and its
15 reinsurance program.

16 185. The DC's Exchange enrollment experience demonstrates that the Rule will
17 substantially increase payment confusion issues. In plan years 2018 and 2019, 197 special
18 enrollment period requests requiring manual review were approved due to carrier errors, carrier
19 misinformation, or other carrier issuers that caused plan terminations based on non-payment of
20 premiums. The DC Exchange anticipates the Rule will result in a 50% increase in wrongful
21 terminations because the separate payments are not paid or applied correctly. As described
22 above, customers who are unable to initiate their policies would then need to seek re-instatement
23 and re-navigate the enrollment process, all the while being without coverage and experiencing the
24 stress and risk of non-coverage. In the District's experience, a substantial portion of these
25 customers would just forego coverage once terminated.

26 186. In Maine, the state's total individual market enrollment reached 70,987 in
27 2019. Because the overwhelming majority of individual health plans in Maine are secured
28 through the marketplace, the Rule's separate billing and payment requirements will likely have a

1 significant adverse effect on Maine consumers. In addition, in 2019 there were nearly 14,000
2 new enrollees. Under the Rule, any new gains in enrollment would be at risk of termination, or
3 non-initiation, of their individual health plans if they failed to make both billing payments on
4 time. The confusion created by the Rule's separate billing and separate payment requirements is
5 likely to result in more cancellations of policies, more questions directed to the Bureau of
6 Insurance and requests for administrative hearings, and additional administrative burden and
7 expense.

8 187. Moreover, in 2018, CMS approved Maine's application for a State Innovation
9 Waiver, for 2019 through 2023, to run a state-based reinsurance program. Maine's reinsurance
10 program is operated by the Maine Guaranteed Access Reinsurance Association (MGARA). As a
11 result of the waiver approval, more consumers in Maine may have coverage, consumers will see
12 lower premiums, and the state will receive pass-through funding to help offset a substantial
13 portion of state costs for MGARA. MGARA is expected to reduce premiums by about 9 percent
14 each year beginning in 2019. Enrollment is expected to increase by about 1.1 percent in 2019, 0.9
15 percent in 2020, and between 0.3 to 0.8 percent after that. Overall, Maine expects enrollment of
16 an additional 300 to 1,100 individual market enrollees annually. MGARA will be funded by
17 multiple sources, including reinsurance premiums paid by issuers and an assessment on all health
18 coverage sold in Maine. Because the number of enrollees determines the amount of federal
19 dollars for MGARA, insurance premiums, and the amount of state dollars needed for MGARA,
20 any reduction in enrollment in the individual market as a result of the Rule's separate billing and
21 separate payment requirements could adversely affect MGARA to the detriment of the state.

22 188. Maryland, in 2019, gained more than 40,000 enrollees who signed up for individual
23 coverage through the Maryland Health Benefit Exchange ("MHBE") for the first time—all of
24 whom would be at risk of termination if they failed to make both billing payments on time.¹⁷
25 This constituted a 2.2% growth in enrollment in 2019, but would now also represent new
26 enrollees who would be at risk of termination, or non-initiation, under the Rule.

27 ¹⁷ Maryland Health Benefit Exchange, 2019 Annual Report 4, 22,
28 <https://tinyurl.com/tdrfkeo>.

1 189. In Oregon, the Oregon Health Insurance Marketplace reached a total enrollment of
2 148,180 for the 2019 plan year, gaining 35,617 new enrollees. As in other states, new enrollees
3 who fail to make the premium payment in full would risk coverage non-initiation. As indicated
4 by the numbers of new enrollees for 2019, tens of thousands of new enrollees could potentially be
5 impacted simply because they failed to pay a nominal portion of their insurance coverage. This is
6 at odds with Oregon's goal of comprehensive, quality health insurance for all its residents.

7 190. In Vermont, there are over 25,000 individuals enrolled in qualified health plans in the
8 individual market. In 2019, there were 3,884 new enrollees who purchased qualified health plans
9 through Vermont Health Connect. The Rule's separate billing and separate payment
10 requirements will create customer confusion, and are likely to result in unnecessary dis-
11 enrollments or cause new enrollees from effectuating new policies.

12 **4. The Rule Will Increase Consumer Confusion, and Lead to Coverage** 13 **Termination**

14 191. The added confusion imposed by the separate billing and separate payment
15 requirements will likely result in more consumers losing healthcare coverage entirely, as the Rule
16 does not prohibit issuers from terminating coverage for failure to pay the separate \$1 premium for
17 abortion coverage.

18 192. The Rule's resulting confusion is significant because it reveals HHS's lack of due
19 diligence and awareness of most consumers' experience with healthcare insurance. Often,
20 consumers wary of financial deception may intentionally disregard a second bill suspecting that
21 the bill for a nominal amount is a scam since the consumer may have already paid the first bill.
22 (Comment by Planned Parenthood Federation of America (citing a study reporting consumers
23 described the separate billing process as "a scam," "super confusing," "an unnecessary hassle,"
24 "inconvenient," and "frustrating"¹⁸). The frustration of failing to make sense of health insurance
25 programs or bills can force some consumers into blindly paying excessive charges, or ignore them
26 and risk losing coverage and incurring more debt in fees.

27 ¹⁸ Comment cites Motivate Design, *Usability Study on Nelson Amendment Implementation*
28 *Report* (2011) (on file with Planned Parenthood Federation of America).

1 193. Any loss of private healthcare coverage will harm the most vulnerable residents (as
2 discussed above in paragraph 123), relegating the uninsured and underinsured and largely low-
3 income communities to public services or emergency care. Despite comments submitted by
4 Physicians for Reproductive Health raising these facts, the final Rule failed to account for the
5 harms incurred from any inadvertent loss of healthcare coverage, the resulting increased
6 premiums, higher out-of-pocket and uncompensated care costs, and the rise of unintended
7 pregnancies from loss of access to abortion services.

8 194. The risk of coverage termination applies to all qualified health plan enrollees. Under
9 the Rule, while issuers are not required to terminate coverage for failure to pay the separate \$1
10 bill, the Rule does not prohibit issuers from choosing to terminate the entire policy instead of
11 spending additional resources relating to ongoing consumer outreach and debt collection. In fact,
12 issuers will nonetheless “still be required to collect the premium for the...abortion coverage.” 84
13 Fed. Reg. 71,705. And while HHS’s professed reason for granting issuers the ability to
14 implement opt out mechanisms for policy holders to modify their plans is to mitigate the risk of
15 coverage termination, this non-enforcement policy is discretionary and not mandatory. *Id.* at
16 71,706. Thus, qualified health plans in states without abortion coverage mandates could
17 nevertheless decide not to implement the discretionary policy, and simply choose to terminate the
18 policy holder’s coverage for having failed to pay the \$1 premium. This largely leaves the risk of
19 termination unaltered. Loss of coverage due to a mere billing technicality could be a matter of
20 life or death for consumers dealing with sensitive medical procedures and ongoing treatments.

21 195. In addition, the Rule will leave consumers—both men and women already beyond
22 their reproductive years—more confused after they receive a separate monthly bill for abortion
23 coverage, a health service they no longer need. This could prompt policy subscribers, under the
24 Rule’s new opt-out discretion now afforded to some issuers, to decline the benefit of abortion
25 coverage, without understanding that this inadvertently triggers the termination of such coverage
26 for any other enrollees under the policy who may still require such services themselves.

27 **5. The Rule Is Contrary to State Policy, Will Increase Uncompensated**
28 **Costs and Hurt the States’ Fiscs**

1 196. As discussed above, the confusion imposed by the Rule's separate billing and
2 separate payment requirements is likely to result in consumers losing their health coverage
3 entirely. Ultimately, any lapse or loss of coverage, abortion or otherwise, could result in more
4 unplanned births, an increase in uncompensated care costs, and consumers foregoing preventative
5 care and medically necessary but unaffordable health care.

6 197. If residents in need of medically necessary care do not have insurance coverage, they
7 will turn to state-funded public programs, such as welfare or emergency room care. Yet, HHS
8 wholly failed to consider the full costs and the risks that come from arbitrarily complicating or
9 restricting access to healthcare coverage, which will undeniably costs residents and the States'
10 fiscs.

11 198. As an example, HHS's final Rule heightens the risk that women will end up without
12 abortion coverage. Given the costs of abortions, many of these women will not have the financial
13 means of obtaining one, which increases the likelihood of women falling into cycles of poverty
14 and reliance on public assistance programs. Women whose healthcare coverage is terminated or
15 non-initiated, and do not have knowledge, time, or resources to obtain or reinstate that coverage,
16 will turn to state-funded programs.

17 199. In California, women and individuals in need of healthcare services but left without
18 coverage could turn to the state-funded Family Planning, Access, Care, and Treatment (Family
19 PACT) program, or emergency care for their reproductive healthcare needs. An increase in
20 unplanned births due to loss of coverage will raise State costs. In 2010, for example, 64.3% of
21 unplanned births in California were publicly funded. That year, in California, the federal and
22 state governments spent \$1.8 billion on unintended pregnancies; \$1.062 billion was paid by the
23 federal government and \$689.3 million was paid by the State. In 2010, Maryland paid for 19,000
24 unplanned births.¹⁹

25 200. Importantly, the Rule puts all residents are at risk of such coverage loss, which will
26 likely further increase the hospital and the States' uncompensated care costs. According to a

27 ¹⁹ https://www.guttmacher.org/sites/default/files/factsheet/md_8_0.pdf
28

1 recent estimate, the loss of insurance coverage and associated uncompensated costs would lead to
2 an exorbitantly high financial loss for the States.²⁰

3 201. In California, between 2010 and 2015, an estimated 3,826,000 people gained
4 coverage. From 2019 to 2028, a rise in uninsured rates could lead to a loss of federal marketplace
5 spending and Medicaid spending, risking \$61.1 and \$99.1 billion respectively—a total loss of
6 \$160.2 billion. If California’s coverage gains were put at risk, it is estimated that California
7 hospitals could lose \$64.1 billion and physicians could lose \$24.7 billion. Uncompensated care
8 costs in California would increase by \$140.1 billion over this period.

9 202. Similarly, since the implementation of the Affordable Care Act the number of
10 uninsured New Yorkers decreased by approximately 1 million. A rise in uninsured rates due to
11 the Rule could increase the fiscal and human costs of uncompensated care across the state. New
12 York hospitals have reported a dramatic decrease in self-pay hospital utilization because patients
13 have gained insurance—a usual source of payment. New York State Institutional Cost Reports
14 show a 23% reduction in self-pay hospital emergency room visits, a 40% reduction in self-pay
15 inpatient services and a 17% reduction in self-pay outpatient visits. Having a usual source of
16 payment for patients reduces the risk of uncompensated care costs.²¹

²¹ Declaration of Dr. Howard A. Zucker ISO Motion to Intervene of State of California, et al., (18-cv-167), April 6,

1 203. In Colorado, since the implementation of the Affordable Care Act, approximately
2 600,000 more Coloradans have obtained insurance coverage. As of 2019, women comprised
3 approximately 51 percent of people who signed up for individual coverage through Connect for
4 Health Colorado. The Rule threatens enrollment in qualified health plans in Colorado thereby
5 increasing the fiscal and human costs of uncompensated care across Colorado. As costs of
6 uncompensated care rise, so do rates charged by providers and hospitals, costs that are eventually
7 passed onto all payers. Additionally, any increase in the uninsured population in Colorado and
8 subsequent increase in uncompensated care rates directly injure Colorado financially as a payer of
9 hospital and provider costs through Colorado’s Medicaid program.

10 204. In the District of Columbia between 2010 and 2015, an estimated 25,000 people
11 gained coverage. From 2019 to 2028, a rise in uninsured rates could lead to a loss of federal
12 marketplace spending and Medicaid spending, risking \$100 million and \$1.7 billion
13 respectively—a total loss of \$1.7 billion. If these gains were put at risk, it is estimated that
14 District of Columbia hospitals could lose \$700 million and physicians could lose \$200 million.
15 Uncompensated care costs in the District of Columbia would increase by \$1.7 billion over this
16 period.

17 205. In Maine, from 2010 to 2018, the rate of uninsured people dropped from 11% to 8%,
18 resulting in 37,000 fewer uninsured people – mostly attributable to the private coverage
19 improvements in the ACA, since the consequences from the MaineCare (Medicaid) expansion
20 were not fully realized until 2019. Uncompensated care costs in Maine fell by \$44 million from
21 2013 to 2015 alone. The number of people insured through the individual market more than
22 doubled, rising from approximately 32,000 in 2013 to over 70,000 in 2019, according to the
23 Maine Bureau of Insurance. In the 2019 open enrollment period, women comprised 54 percent of
24 people who signed up for individual coverage through HealthCare.gov in Maine.

25
26 _____

27 2018.

28

1 206. In Maryland, 156,963 residents have obtained private health insurance and more than
2 1,000,000 are covered by Medicaid as of 2019, cutting the overall rate of the uninsured to just
3 6%.²² Uncompensated care costs in the state decreased by an estimated \$354 million from 2013
4 to 2016.²³ In Maryland, under current agency policy, uncompensated care for all Maryland
5 hospitals is funded by a statewide pooling system in which regulated Maryland hospitals draw
6 funds from the pool if they experience a greater-than-average level of uncompensated care and
7 pay into the pool if they experience a less-than-average level of uncompensated care. This policy
8 ensures that the cost of uncompensated care is shared equally across all the hospitals within the
9 system. Thus, when uncompensated care increases, hospital rates increase accordingly, and
10 payers must pay increased rates.

11 207. Because Maryland is a payer of hospital rates, Maryland is directly injured by any
12 increase to the uncompensated care rate that will occur if the uninsured population in Maryland
13 increases. And, any increase in hospital rates will undermine and put at risk Maryland's unique
14 Total Cost of Care Model Agreement with CMS, an Agreement to achieve fixed amounts of
15 savings to Medicare per capita total cost of care during each model year between 2019 and 2023.
16 The Models financial targets are structured to obtain a total of over \$1 billion in Medicare total
17 cost of care savings by the fifth performance year of the Model.

18 208. In Oregon, between 2010 and 2015, an estimated 403,000 people gained coverage.
19 From 2019 to 2028, a rise in uninsured rates could lead to a loss of federal marketplace spending
20 and Medicaid spending, risking \$3.3 and \$35.1 billion respectively—a total loss of \$38.4 billion.
21 If these gains were put at risk, it is estimated that Oregon hospitals could lose \$17.5 billion and
22 physicians could lose \$5.7 billion. Uncompensated care costs in Oregon would increase by \$15.2
23 billion over this period.

24
25 _____
26 ²² Maryland Health Benefit Exchange, 2019 Annual Report 4, 19,

27 ²³ Matt Broadus, *ACA Medicaid Expansion Drove Large Drop in Uncompensated Care*,
28 Ctr. on Budget and Policy Priorities (Nov. 9, 2019), <https://www.cbpp.org/blog/aca-medicaid-expansion-drove-large-drop-in-uncompensated-care>.

1 209. In Vermont, between 2010 and 2015, an estimated 26,000 people gained coverage.
2 From 2019 to 2028, a rise in uninsured rates could lead to a loss of federal marketplace spending
3 and Medicaid spending, risking \$1 and \$1.9 billion respectively—a total loss of \$2.9 billion. If
4 these gains were put at risk, it is estimated that Vermont hospitals could lose \$500 million and
5 physicians could lose \$300 million. Uncompensated care costs in Vermont would increase by
6 \$2.4 billion over this period.

7 **6. The Rule Harms Women and Creates Unreasonable Burdens on**
8 **Abortion Care**

9 210. Indisputably, the Rule disproportionately impacts the States, which are committed to
10 protecting women’s access to the full range of reproduction options and allow or require qualified
11 health plans to include abortion coverage as part of the qualified health plan’s benefits.

12 211. The Rule primarily seeks to create barriers to access to women’s healthcare by
13 targeting coverage of a service unique to women—and protected by federal and state laws—
14 abortion care.

15 212. While the Rule directs issuers to separately bill policy holders without regard to sex,
16 abortion coverage and services are unique to women’s reproductive health. 84 Fed. Reg. 71,694.
17 Contrary to nondiscrimination protections provided by the ACA, the Rule has a disparate impact
18 on women because it conditions their access to comprehensive reproductive healthcare on the
19 onerous regulatory burdens requiring separate billing and payments and seeks to eliminate legal
20 abortion coverage entirely in states that do not require it.

21 213. As discussed in *Subsection F(4)* above, the Rule creates unnecessary confusion, and if
22 separate bills are not paid at the onset of enrollment, women run the risk of being left without any
23 coverage at all. Failing to comply with the Rule impacts women differently than men.

24 214. The risk of losing coverage of abortion services naturally falls heaviest on women
25 who may require it, potentially resulting in irreversible harm in the form of delayed care,
26 unintended pregnancies, or health complications. Without insurance coverage, a woman must
27 procure the necessary funding to cover the out-of-pocket expenses in time to obtain a needed
28 abortion, placing unreasonable obstacles in her attempt to exercise a legal right.

1 215. For example, if an issuer terminates a woman’s healthcare coverage when she
2 requires abortion services, a time-sensitive matter, she would find herself in the difficult position
3 of having to pay out-of-pocket or endure additional risk while attempting to secure alternative
4 coverage, which may or may not be available. Ultimately, delays in reaching and obtaining care
5 can push women later into their pregnancies, even up to the point that they might not be able to
6 obtain a wanted abortion, depending on the gestational limits on abortion in their state.²⁴ Those
7 forced to delay abortion care often experience negative mental health outcomes, and consider
8 ending the pregnancy on their own, either with medications (misoprostol, herbs or home
9 remedies) or by blunt-force physical trauma.²⁵

10 216. HHS is aware the Rule’s risk of coverage loss could leave women to pay higher out-
11 of-pocket costs for abortion care. 84 Fed. Reg. 71,705. HHS also received many comments
12 expressing “concern that when legal abortion becomes inaccessible, women who seek to end their
13 pregnancy turn to unsafe and illegal methods, risking arrest, serious injury, or even death.” *Id.*
14 But HHS simply concludes that “any additional burden these enrollees experience related to
15 understanding” the Rule or inadvertently failing to submit payments in full due to confusion, “is
16 unrelated to whether [enrollees] actually do access coverage” for abortion services. *Id.* at 71,695.
17 HHS’s statement fails to meaningfully consider to the pivotal importance of healthcare coverage
18 that enables women to obtain lawful, necessary healthcare services—and in this case—for women
19 to exercise their constitutionally protected right to abortion. HHS even disregards commenters
20 who stressed, in their professional opinion, that access to comprehensive reproductive healthcare
21 “is one of the few means of regaining self-esteem and a sense of bodily autonomy” for women
22 experiencing partner abuse, reproductive coercion, and sexual assault. (Comment submitted by
23 University of California, Irvine, School of Nursing, Assistant Professor Candace W. Burton, RN,
24 PhD).

from Major US Cities: Systematic Online Search (2018), <https://www.jmir.org/2018/5/e186/>.

27 ²⁵ Jenna Jerman et al., *Barriers to Abortion Care and Their Consequences for Patients*
Traveling for Services: Qualitative Findings from Two States, *Perspectives on Sexual and*
28 *Reproductive Health* (2017), <https://onlinelibrary.wiley.com/doi/full/10.1363/psrh.12024>.

1 217. This unnecessary burden applies to no other healthcare service or benefit. The Rule's
2 sole function is to make it more burdensome and more confusing for women to pay for health
3 plans that include legal abortion services, and frustrate the receipt of such coverage in states that
4 require or allow it. Further, for many women, access to a health plan that includes abortion
5 coverage is a necessary antecedent to the ability to exercise the legal right to obtain the procedure.
6 Forcing women to adapt to onerous and nonsensical billing practices in order to maintain abortion
7 coverage is discriminatory.

8 218. The receipt of separate monthly bills, and the costs and labor of having to submit or
9 mail separate payments for abortion coverage is plainly unnecessary, and only serves to remind
10 women that their constitutional right to abortion services is one that is heavily regulated. This can
11 potentially stigmatize abortion and shame women for exercising their constitutional right to
12 choose when and whether to become mothers. Women forced to carry an unwanted pregnancy to
13 term risk postpartum hemorrhage and eclampsia, and report a need to limit physical activity for a
14 period three times longer than women who obtain abortions.²⁶ Women unable to plan
15 pregnancies and who have pregnancies too close together face an increased health risks, such as
16 premature birth, low birth weight, congenital disorders, and schizophrenia.²⁷ Carrying an
17 unwanted pregnancy to term can also result in a greater risk of domestic violence.²⁸

18 219. Importantly, communities of color are most harmed when abortion access is
19 undermined. (See comments submitted by the Public Health and Insurance Committee of the
20 Connecticut General Assembly, California Latinas for Reproductive Justice (CLRJ), and PPFAs).
21 The Rule has failed to consider the disproportionate effect these changes will have on women

25 ²⁷ *Family Planning: Get the Facts About Pregnancy Spacing*, Mayo Clinic,
26 <https://www.mayoclinic.org/healthy-lifestyle/getting-pregnant/in-depth/family-planning/art-20044072>.

27 ²⁸ Sarah C.M. Roberts et al., *Risk of Violence from the Man Involved in the Pregnancy*
28 *after Receiving or Being Denied an Abortion*, 12:144 *BMC Medicine* at 5 (2014),
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4182793/>.

1 with limited incomes, women of color, those with limited English proficiency and people in states
2 where abortion is not required.

3 220. It has been well documented that low-income women who lack insurance coverage
4 for abortion often struggle to pay for the procedure out-of-pocket, and these same financial
5 hardships drive families further into poverty. Abortion procedures are expensive, costing on
6 average between \$500 and \$1,500. And most enrollees obtaining advanced premium tax credits
7 or cost-sharing reductions, already have limited incomes—which is often a requirement to meet
8 eligibility thresholds.

9 221. Lack of access to abortion also results in poorer socioeconomic outcomes, including
10 lower rates of full-time employment and increased reliance on public programs.²⁹ Conversely,
11 increased availability of abortion results in *increased* women’s participation in the workforce,
12 especially for women of color.³⁰ As the Supreme Court recognized, women’s control of their
13 reproductive healthcare ensures that they can participate “equally in the economic and social life
14 of the Nation.” *Casey*, 505 U.S. at 856; *see also Priests for Life v. U.S. Dep’t of Health and*
15 *Human Services*, 808 F.3d 1, 22-23 (2015) (Kavanaugh, J., dissenting) (“It is commonly accepted
16 that reducing the number of unintended pregnancies would further women’s health, advance
17 women’s personal and professional opportunities, reduce the number of abortions, and help break
18 a cycle of poverty.”). Ultimately, women who want an abortion but are unable to afford one
19 without insurance coverage are more likely to spend years living in poverty than women who are
20 able to receive an abortion.

21 222. Control over family planning and reproductive healthcare are fundamental to gender
22 equality and women’s empowerment, as it is a key driver in reducing poverty. Thus, restrictions
23 that prevent women from obtaining abortion coverage can have negative lifelong consequences,

24 ²⁹ Diana Greene Foster et al., *Socioeconomic Outcomes of Women Who Receive and*
25 *Women Who are Denied Wanted Abortions in the United States*, 103 Am. J. Pub. Health 407, 409
(2018), <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5803812/>.

26 ³⁰ *See* Anna Bernstein et al., *The Economic Effects of Abortion Access: A Review of the*
27 *Evidence*, Ctr. for Economics of Reproductive Health, Institute for Women’s Policy Research
28 (2019), at v., https://iwpr.org/wp-content/uploads/2019/07/B379_Abortion-Access_rfinal.pdf.

1 resulting in reductions in full-time employment, limited educational opportunities, and increased
2 incidences of poverty.³¹

3 223. The potential impacts of the Rule, namely the loss of healthcare coverage and having
4 to carry an unwanted pregnancy to term, accentuate the struggles already present for women
5 across the Nation, and run contrary to the States' efforts to safeguard women's reproductive
6 freedom.

7 **FIRST CAUSE OF ACTION**

8 **(Violation of APA; 5 U.S.C. § 706—Exceeds Statutory Authority)**

9 224. Plaintiffs re-allege and incorporate the foregoing paragraphs as if set forth in full.

10 225. The APA requires courts to “hold unlawful and set aside” agency action that is “in
11 excess of statutory jurisdiction, authority, or limitations, or short of statutory right.” 5 U.S.C. §
12 706(2)(C).

13 226. The Rule exceeds Defendants' authority under Section 1303, which prohibits the use
14 of federal subsidies to pay for abortion coverage and services, not the collection of a single
15 payment or the use of a single billing statement.

16 227. The Rule creates a significant change in policy that cannot be reconciled with the
17 text and purpose of Section 1303, the authorizing statute.

18 228. Defendants illegally attempt to redefine subsections of the statute, expanding the
19 requirement for the collection of separate payments and injecting new notice requirements that
20 are directly contrary to the limitations in Section 1303.

21 229. By promulgating this Rule, Defendants have acted in excess of their authority granted
22 to them by the ACA. In doing so, Defendants have taken action in violation of the APA. The
23 Rule is therefore invalid.

24 **SECOND CAUSE OF ACTION**

25 **(Violation of APA; 5 U.S.C. § 706(2)(A)—Contrary to Law)**

26 230. Plaintiffs re-allege and incorporate the foregoing paragraphs as if set forth in full.

27
28

³¹ *Supra* Foster et al.

1 231. The APA requires courts to “hold unlawful and set aside” agency action that is “not
2 in accordance with law.” 5 U.S.C. § 706(2)(A).

3 232. The Rule conflicts with Section 1554 of the Affordable Care Act, which prohibits the
4 Secretary of HHS from promulgating any regulation that limits access to healthcare services. 42
5 U.S.C. § 18114. Among other key provisions, Section 1554 prohibits agency actions that (1)
6 unreasonably inhibit access to “appropriate medical care;” (2) prevent “timely” access to care; or
7 (3) would prevent a patient from obtaining treatment “for the full duration of [their] medical
8 needs.” *Id.*

9 233. As addressed previously, the Rule’s separate abortion billing and collection
10 requirements leave everyone at risk of coverage termination and will unreasonably inhibit access
11 to appropriate and timely medical care, including abortion, in violation of Section 1554.

12 234. Additionally, the Rule is also in direct conflict with Section 1557 of the ACA, which
13 provides anti-discrimination protections in health programs based on any ground listed under four
14 different federal civil rights statutes, including Title VI of the Civil Rights Act of 1964 (race,
15 color, national origin, and sex), including sex under Title IX of the Education Amendments of
16 1972. 42 U.S.C. § 18116.

17 235. Defendants’ Rule specifically targets a healthcare service unique to women—
18 abortion. HHS recognizes, as it must, that coverage for abortion services is primarily sought by
19 “women who may ultimately access such services.” 84 Fed. Reg. 71,694. The Rule, if
20 implemented, will result in a disparate impact on women’s access to comprehensive medical care.

21 236. The likely impact of this Rule is the loss of insurance coverage, which will lead to
22 increased healthcare costs for consumers that no longer have insurance. This is in complete
23 contravention of the widely recognized core purposes of the ACA, which are to “increase the
24 number of Americans covered by health insurance and decrease the cost of health care”. *Nat’l*
25 *Fed’n Indep. Bus. v. Sebelius*, 567 U.S. 519, 538 (2012).

26 237. By promulgating this Rule, Defendants have acted contrary to the Affordable Care
27 Act in violation of the APA. The Rule is therefore invalid.

28

1 **THIRD CAUSE OF ACTION**

2 **(Violation of APA; 5 U.S.C. § 706—Arbitrary, Capricious, and Abuse of Discretion)**

3 238. Plaintiffs re-allege and incorporate the foregoing paragraphs as if set forth in full.

4 239. The APA requires courts to “hold unlawful and set aside” agency action that is
5 “arbitrary, capricious, [or] an abuse of discretion....” 5 U.S.C. § 706(2)(A).

6 240. In issuing the Rule, Defendants have failed to provide a “satisfactory explanation”
7 and “rational connection between the facts found and the choice made.” *Motor Veh. Mfrs. Ass’n*
8 *v. State Farm Ins.*, 463 U.S. 29, 42 (1983).

9 241. Defendants ignored critical impacts of the Rule as a whole that the States and others
10 raised in public comments. Defendants have offered an explanation for their decision that “runs
11 counter to the evidence before the agency” and is “so implausible that it could not be ascribed to a
12 difference of view or the product of agency expertise.” *State Farm Ins.*, at 43.

13 242. By promulgating this new Rule, Defendants have acted arbitrarily and capriciously
14 and have abused their discretion in violation of the APA. The Rule is therefore invalid.

15 **FOURTH CAUSE OF ACTION**

16 **(Violation of APA; 5 U.S.C. § 553—Procedural Rulemaking Violation)**

17 243. Plaintiffs re-allege and incorporate the foregoing paragraphs as if set forth in full.

18 244. The APA generally requires agencies to provide the public notice and an opportunity
19 to be heard before promulgating a regulation. An agency wishing to promulgate a regulation
20 must publish in the Federal Register a notice of proposed rulemaking that includes “(1) a
21 statement of the time, place, and nature of public rule making proceedings; (2) reference to the
22 legal authority under which the rule is proposed; and (3) either the terms or substance of the
23 proposed rule or a description of the subjects and issues involved.” 5 U.S.C. § 553(b). After the
24 notice has issued, “the agency shall give interested persons an opportunity to participate in the
25 rulemaking through submission of written data, views, or arguments with or without opportunity
26 for oral presentation.” *Id.* § 553(c).

1 656 F.3d 253 (4th Cir. 2011). Congress may not infringe on the States’ sovereign authority to
2 enforce its own laws. “[W]hen a federal law interferes with a state’s exercise of its sovereign
3 ‘power to create and enforce a legal code’ [] it inflict[s] on the state the requisite injury-in fact.”
4 *Cty. of Santa Clara v. Trump*, No. 17-CV-00485-WHO, 2017 WL 1459081, at *17 (N.D. Cal.
5 Apr. 25, 2017), reconsideration denied, No. 17-CV-00485-WHO, 2017 WL 3086064 (N.D. Cal.
6 July 20, 2017), quoting *Ohio ex rel. Celebrezze v. U.S. Dep’t of Transp.*, 766 F.2d 228, 233 (6th
7 Cir. 1985).

8 252. HHS’ disregard for the States’ laws and policies violates the Tenth Amendment’s
9 federalism principles.

10 253. The Rule penalizes the States for requiring and allowing qualified health plans to
11 provide abortion coverage in its state-based exchanges. The States of California, New York,
12 Colorado, District of Columbia, Maine, Maryland, Oregon, and Vermont all require or encourage
13 the provision of abortion coverage in qualified health plans. This represents the States’ policy
14 priorities related to safeguarding women’s reproductive freedom by securing abortion coverage to
15 ensure that individuals have access to all the services they may need and have the option of
16 exercising constitutionally protected rights.

17 254. The ACA authorizes the States’ insurance commissioners as the entities primarily
18 responsible for monitoring, overseeing, and enforcing the provisions in Section 1303 related to
19 qualified health plans segregation of funds for abortion services. 42 U.S.C. § 18023(b)(2)(E)(i);
20 45 C.F.R. § 156.280(e)(5). This in itself demonstrates that the ACA contemplated state-
21 flexibility that state-based exchanges were designed to retain.

22 255. HHS simply runs past this, instead threatening to step in and enforce these
23 unreasonable changes in the State’s place, or worse, short-change the States due HHS federal
24 funding for failing to bend to their regulatory scheme.

25 256. First, the Rule states that “if HHS determines that a state (or State Exchange) has
26 failed to substantially enforce a federal requirement related to Exchanges and the offering of
27 QHPS through Exchanges, including section 1303 of the PPACA’s separate payments
28

1 requirement (or other requirements), the Secretary may step in to enforce the requirement against
2 the non-compliant issuer.” 84 Fed. Reg. at 71,692 (citing 42 U.S.C. § 18041(c)(2)).

3 257. Second, under 42 U.S.C. § 18033(a)(4) (2018), HHS may conclude that the States’
4 inability to comply, or allow issuers to comply, with the Rule amounts to a “pattern of abuse”
5 regarding compliance with HHS standards related to Title I of the ACA. If “the Secretary
6 determines that an Exchange has engaged in serious misconduct with respect to compliance with
7 the requirements of, or carrying out of activities required” under the ACA, HHS has the authority
8 to rescind up to one percent (1%) of the federal funding dollars due to a state *under any program*
9 *administered by HHS*. 84 Fed. Reg. 71,678.

10 258. This is significant, because 1% of annual HHS funds amounts to substantial federal
11 dollars at risk for the States. Therefore, noncompliance with the Rule risks millions of federal
12 dollars paid to the States for the administration of health programs such as Medicaid.

13 259. In addition, HHS and CMS recent actions demonstrate the administration’s
14 commitment to impeding abortion access and interfering with state sovereignty. On January 24,
15 2020, the Office of Civil Rights of HHS issued a “Notice of Violation to California for its
16 Abortion Coverage Mandate,” which at its core implicates California’s police powers over its
17 regulation of healthcare, “notifying California that it cannot impose universal abortion coverage
18 mandates on health insurance plans and issuers in violation of federal conscience laws.”³² The
19 letter indicates that if California does not receive sufficient assurance that the state will come into
20 compliance with federal law within 30 days, the “action may ultimately result in limitations on
21 continued receipt of certain HHS funds.” This puts California, and the States at large, in a
22 vulnerable position, fearing HHS will seek extreme enforcement actions or penalties merely for
23 choosing to protect their public health interests.

24 260. The Rule runs parallel with this recent CMS action, and is a powerful use of coercion
25 to induce the States to change their sovereign laws—properly promulgated under its police
26 powers—and accept federally imposed policy changes with respect to access to abortion

27 ³² See [https://www.hhs.gov/about/news/2020/01/24/hhs-issues-notice-of-violation-to-](https://www.hhs.gov/about/news/2020/01/24/hhs-issues-notice-of-violation-to-california-for-its-abortion-coverage-mandate.html)
28 [california-for-its-abortion-coverage-mandate.html](https://www.hhs.gov/about/news/2020/01/24/hhs-issues-notice-of-violation-to-california-for-its-abortion-coverage-mandate.html).

1 coverage. *See Nat'l Fed'n Indep. Bus. v. Sebelius* 567 U.S. 519, 578 (“The Constitution simply
2 does not give Congress the authority to require the States to regulate.”). Complying with the
3 Rule’s onerous and excessive changes could in effect cause issuers to leave the States’ exchanges,
4 putting at risk the viability of a strong insurance market in the jurisdictions that require or allow
5 abortion coverage.

6 261. Accepting these changes not only threatens the States’ sovereignty but would require
7 the States to incur significant administrative costs to implement efforts that actually increase risks
8 to its public health and their marketplaces. Compliance with this Rule will undermine our States’
9 police powers over healthcare, and require extensive diversion of resources, interfering with
10 enrollment rates and the insurance risk pool.

11 262. The Rule will impermissibly impose burdens on the States’ sovereignty.

12 263. By promulgating the Rule, Defendants have violated the Tenth Amendment of the
13 U.S. Constitution. Defendants’ violation in itself causes ongoing harm to the States and their
14 residents. The Rule violates the U.S. Constitution and is therefore invalid.

15 **PRAYER FOR RELIEF**

16 WHEREFORE, the Plaintiff States respectfully requests that this Court:

- 17 1. Issue a declaratory judgment that the Rule is an unreasonable interpretation of the law;
- 18 2. Issue a declaratory judgment that the Rule is arbitrary, capricious, an abuse of
19 discretion, not in accordance with law, and contrary to the States’ constitutional rights,
20 powers, privileges and immunities, in violation of the Administrative Procedure Act
21 because HHS failed to justify reasons for the change in policy and respond adequately
22 to the public comments it received;
- 23 3. Issue a declaratory judgment that the Rule engaged in improper procedural rulemaking
24 in violation of the Administrative Procedure Act;
- 25 4. Issue a declaratory judgment that the Rule violates the Tenth Amendment;
- 26 5. Postpone the effective date of the Rule, pending judicial review, pursuant to 5 U.S.C.
27 § 705;
- 28

- 1 6. Hold unlawful and set aside the Rule, pursuant to 5 U.S.C. § 706(2);
- 2 7. Award the States costs, expenses, and reasonable attorneys' fees;
- 3 8. Award such other relief as the Court deems just and proper.
