ORDER

On May 3, 2022, pursuant to the Court’s Order dated March 8, 2022, the parties filed a Joint Status Report (ECF No. 67) advising the Court of their continued efforts to resolve this matter. The parties report that they are working together to determine whether they may resolve this matter without further litigation or can at least streamline the damages and mitigation issues in this case. *See* ECF No. 67. Given the case’s complexity and the large number of interested stakeholders, the parties request the Court continue the stay in this case through July 5, 2022, at which point the parties will file another joint status report.

This is one of several Affordable Care Act (“ACA”) cases before the Court in which the parties are exploring the potential of a negotiated settlement of the plaintiffs’ cost-sharing reduction (“CSR”) claims. *See Blue Care Network of Mich. et al. v. United States*, 20-1000C (filed: Aug. 11, 2020); *Common Ground Healthcare Coop. v. United States*, 17-877C (filed: June 27, 2017); *Me. Cmty. Health Options v. United States*, 17-2057C (filed: Dec. 28, 2017); *Me. Cmty. Health Options v. United States*, 20-458C (filed: Apr. 17, 2020). Each of these cases is stayed pending settlement discussions, with the parties providing periodic joint status reports.
